

GOLDSKY RESOURCES CORP. (FORMERLY FIRST NORDIC METALS CORP.)

ANNUAL REPORT TO SHAREHOLDERS

For the Year Ended December 31, 2025

(Expressed in Canadian Dollars)

MANAGEMENT DISCUSSION AND ANALYSIS (“MD&A”) FOR THE YEAR ENDED DECEMBER 31, 2025

Dated: April 30, 2026

Management’s Responsibility for Financial Reporting:

The accompanying financial report for the year ended December 31, 2025, has been prepared by management using accounting policies consistent with International Financial Reporting Standards (“IFRS”). Other information contained in this document has also been prepared by management and is consistent with the data contained in the annual financial report.

The Company’s certifying officers, are also responsible to ensure that the financial report and the MD&A (together the “filings”) do not contain any untrue statement of a material fact or omit to state a material fact required to be stated or that is necessary to make a statement not misleading in light of the circumstances under which it was made, with respect to the period covered by these filings, and the financial report together with the other financial information included in these filings fairly present in all material respects the financial condition, financial performance and cash flows of the Company, as of the date of and for the periods presented in these filings.

Certain statements in this report may constitute forward-looking statements that are subject to risks and uncertainties. A number of important factors could cause actual outcomes and results to differ materially from those expressed in these forward-looking statements. Consequently, readers should not place any undue reliance on such forward-looking statements. In addition, these forward-looking statements relate to the date on which they were made.

In particular, forward looking comments regarding both the Company’s plans and operations included in the “Description of Business” with respect to management’s planned exploration and other activities, and in “Liquidity”, and “Corporate Summary” regarding management’s estimated ability to fund its projected costs of exploration work and general corporate costs of operations, and its ability to raise additional funding through placement of the Company’s common shares, are plans and estimates of management only and actual results and outcomes could be materially different.

Description of Business:

ACQUISITION OF GOLD LINE RESOURCES LTD

On February 23, 2024, the Company completed the acquisition of all the issued and outstanding common shares of Gold Line Resources Ltd. (“Gold Line”) whereby each Gold Line shareholder received 0.7382 common shares of the Company in exchange for one common share of Gold Line (the “Arrangement”). Pursuant to the Arrangement, the Company issued 8,936,929 common shares with a fair value of \$4,289,726. Gold Line was a Canadian exploration company listed on the TSX-V and OTC Exchange. On completion of the Arrangement, Gold Line’s common shares were delisted from the TSX-V and OTC Exchange.

GOLDSKY RESOURCES CORP. (FORMERLY FIRST NORDIC METALS CORP.)

ANNUAL REPORT TO SHAREHOLDERS

For the Year Ended December 31, 2025

(Expressed in Canadian Dollars)

ACQUISITION OF GOLD LINE RESOURCES LTD (cont'd...):

Description of Business (cont'd...):

As part of the Arrangement, all outstanding share options and warrants of Gold Line were exchanged for share options to acquire up to an aggregate of 387,555 common shares of the Company. All outstanding warrants of Gold Line are now exercisable to acquire 3,547,064 common shares of the Company.

The transaction costs associated with the Arrangement totaled \$101,043 and is comprised of legal fees and transfer agent fees.

The acquisition of Gold Line constitutes an asset acquisition and has been accounted for under the acquisition method in accordance with the guidance provided in IFRS 3, Business Combinations (“IFRS 3”). The assets acquired did not qualify as a business according to the definition in IFRS 3, and therefore the acquisition did not constitute a business combination, but rather it is treated as a payment of equity consideration for the acquisition of Gold Line and its net assets. The value of the consideration paid after allocation to the other net assets acquired, was allocated to exploration and evaluation assets, which are located in Sweden and Finland and consist of the Gold Line Project, the Klippen Gold Project, and the Oijärvi Gold Project.

BARSELE, PROJECT SWEDEN:

The Barsele Property is located 40 km southeast of the town of Storuman in Västerbottens Län, a regional district of northern Sweden approximately 600 km due north of Stockholm. Exploration in the project area has been ongoing for 39 years. From 1985 to 2010, a total of 398 diamond drill holes (43,609 metres) were drilled and in 2006, Northland Resources S.A. (“Northland”) completed a National Instrument 43-101 technical report which contained resource estimates of both indicated and inferred resources and was filed on SEDAR+ by Northland on April 13, 2006.

On October 27, 2010, Orex Minerals Inc. (“Orex”) announced the terms of acquisition of the Barsele Project from Northland.

At Barsele, the main gold-bearing system remains open in all directions. The structurally linked gold mineralized “lodes” occur mainly within a granodiorite host and to a lesser extent, volcanic and sedimentary rocks. Multiple parallel to sub-parallel “lodes” that vary in width from 10 metres to 100 metres, combine for a maximum known thickness (including low grade-waste islands) of 425 metres. The Avan–Central–Skiråsen zones have a strike length approaching 3.6 kilometres and that same northwest trending structural corridor contains localized bodies with gold mineralization over an additional 4.4 kilometres. The drill tested depth of the mineralized system approaches 1.0 kilometre and remains open. Gold is generally associated with arsenopyrite and low base metal content and often occurs as native metal.

The Norra Zone is a small, massive sulphide deposit. In the Norra Zone, sulphide mineralization is exposed in two open trenches in the centre of the drilled mineralized trend. The main mineralized body is 300 metres in strike-length and 50 metres in width.

In May 2011, Orex initiated a 2,500 line-kilometre airborne geophysical survey of the entire Barsele Property. SkyTEM Surveys of Denmark carried out that work. That same year, Orex engaged Finland-based SuomenMalmiOy (“SMOY”) and LeBel Geophysics of Canada to conduct ground follow-up induced polarization and electromagnetic surveys. In November of 2011, Orex commenced a 6,200-metre diamond drilling program which targeted the Central (12 holes) and Avan (4 holes) gold zones.

In October of 2013, Orex gained 100% ownership in the Barsele Project from Northland through work, cash and share offerings.

On February 23, 2015, Orex announced a Letter of Intent to joint venture the Barsele Project with Agnico Eagle Mines Ltd. of Canada. On August 6, 2015, Orex announced an arrangement agreement to spin out its interest in the Barsele Project to a wholly owned subsidiary named Barsele Minerals Corp. Orex would retain a 2% net smelter royalty on the Barsele Project.

GOLDSKY RESOURCES CORP. (FORMERLY FIRST NORDIC METALS CORP.)

ANNUAL REPORT TO SHAREHOLDERS

For the Year Ended December 31, 2025

(Expressed in Canadian Dollars)

Description of Business (cont'd...):

BARSELE PROJECT, SWEDEN (cont'd...):

On June 11, 2015, Agnico Eagle Sweden acquired a 55% interest in the Barsele Project which included Gunnarn Mining AB and Gunnarn Exploration AB (collectively "Barsele JV") for cash payments and work considerations. The project became a joint venture between Agnico Eagle Mines Limited (55%) and Barsele Minerals Corp. (45%). As part of the joint venture arrangement, Agnico Eagle could earn an additional 15% interest in the project, through completion of a pre-feasibility study.

As of mid-October 2015, total drilling by all parties on the Barsele Project equaled 49,809 metres in 414 drill holes.

On October 28, 2015, a \$US3.25 million exploration program was approved by Agnico Eagle and Barsele, with Agnico Eagle serving as operator, under the guidance of a joint venture technical committee. Diamond drilling of 12,300 metres was planned around the existing resource areas, including down-plunge extensions of gold mineralization. Additional trenching, structural mapping, till sampling, hyperspectral imaging, plus metallurgical and environmental studies were also undertaken.

At the end of April 2016, Agnico Eagle had drilled a total of 25 holes in the Central and Skiråsen zones totaling 13,264 metres. Highlight drilling results included: Central hole CNT-15016, with 112 metres grading 2.01 g/t gold. At Skiråsen hole SKI-15001, yielded 61 metres grading 1.61 g/t gold. During this time, it was recognized that the Central and Skiråsen gold zones are interconnected, with a combined strike length of approximately 1,400 metres, and extending to a depth of at least 540 metres, and ranging in width from 10 to 150 metres.

In October of 2016 Agnico Eagle announced an increase to the Barsele 2016 exploration budget of \$US2.5 million dollars. Planned drill meterage increased from 19,000 to 36,000 metres and in November 2016 it was announced that Agnico Eagle had fulfilled its expenditure commitment of \$US7.0 million dollars, ahead of the June 11, 2018, deadline.

Highlight drill results from the final six months of 2016 include: Skiråsen hole SKI-16006 with 69.8 meters grading 1.31 g/t gold, including 25.7 meters grading 2.17 g/t gold; SKI-16007 with 33.0 meters grading 4.08 g/t gold; Avan hole AVA-16005 intersected 6.0 meters grading 16.20 g/t gold and 26.00 meters grading 2.22 g/t gold; AVA-16007 intersected 33.40 meters grading 1.68 g/t gold and 8.00 meters grading 3.23 g/t gold; Central hole CNT-16001 intersected 27.00 meters grading 1.80 g/t gold and CNT-16002 intersected 134 meters grading 1.11 g/t gold, including 39.00 meters grading 2.41 g/t gold; with CNT-16011 yielding 23.0 meters grading 7.90 g/t gold at 559 meters depth.

During February 2017, the Company announced an updated mineral resource estimate for the Barsele Project, prepared internally by Agnico Eagle.

Highlight drill result releases from the first six months of 2017 include: Skiråsen hole SKI-16010 with 6.0 metres grading 33.46 g/t gold, plus 178.0 metres grading 1.68 g/t gold; SKI-16015 with 31.0 metres grading 2.29 g/t gold; SKI-17003 yielded 8 gold intercepts, including 4.0 metres grading 60.18 g/t gold and extending Skiråsen mineralization to 595 metres depth; SKI-16002 yielded 13.0 metres grading 2.15 g/t gold and extending Skiråsen mineralization an added 100 metres to 695 metres depth; Central hole CNT-16017 yielded 31.0 metres grading 2.65 g/t gold; CNT-16032 yielded 92 metres grading 1.63 g/t gold; CNT-17006 yielded 25.0 metres grading 5.34 g/t gold. Avan hole AVA-16024 extended Avan mineralization 375 metres NW of the known Avan Zone.

GOLDSKY RESOURCES CORP. (FORMERLY FIRST NORDIC METALS CORP.)

ANNUAL REPORT TO SHAREHOLDERS

For the Year Ended December 31, 2025

(Expressed in Canadian Dollars)

Description of Business (cont'd...):

BARSELE PROJECT, SWEDEN (cont'd...):

During the summer of 2017, a regional surface till sampling program was completed. This work defined a broad area with anomalous precious and base metal responses within the northern third of the property, several kilometers to the north of existing drilling. As the Barsele Project was originally discovered using till sampling, these results were considered significant.

During October 2017 metallurgical testing results were announced by Agnico Eagle, stating approximately 92 percent gold recovery from core samples throughout the gold zones. Four diamond drilling machines were operational within the property.

Highlight drill results from the final six months of 2017 include: hole CNT-17012 that yielded 19.75 metres grading 5.07 g/t gold, indicating continuity along the 100-metre gap between the Central and Skiråsen zones; CNT-17020 yielding 21.0 metres grading 2.96 g/t gold; while drilling at the Risberget Zone, 3.7 kilometres to the east-southeast of Skiråsen, yielded four significant gold hits, with a best result of 15.3 metres grading 1.87 g/t gold.

On April 12, 2018, the Company filed on SEDAR+ an updated mineral resource estimate report entitled “NI 43-101 Technical Report and Mineral Resource Estimate on the Barsele Property” with an effective date of February 15, 2018 for the Avan-Central-Skiråsen gold zones at Barsele, and reported 15,279,000 tonnes grading 2.91 g/t gold, containing 1,427,000 Inferred ounces and 2,399,000 tonnes grading 2.50 g/t gold containing 193,000 Indicated ounces (all at a 1.75 g/t gold cut-off grade). Carl Pelletier, P. Geo., B.Sc., of InnovExplo Inc., of Val d'Or, Quebec undertook responsibility as Qualified Person for this mineral resource estimate.

As project operator, Agnico Eagle has developed a community relations program to engage the various stakeholders in the Barsele Project area. Basic environmental assessment and surface water characterization, species studies and hydrogeology studies are ongoing.

Highlight drill result releases from the first six months of 2018 include: hole RIS-17007 that yielded 32.0 metres grading 2.92 g/t gold and RIS-17005 that yielded 1.0-metre grading 248.0 g/t gold and expanding the Risberget gold potential zone from 250 meters to 1,300 meters. At the Norra VMS Zone, hole NOR-17007 yielded 9.5 metres grading 1.40 g/t gold, 10.54 g/t silver, 1.61% zinc. At Central, hole CNT-17028 yielded the deepest gold intersection to date, with 12.0 metres grading 3.61 g/t gold at a midpoint depth of 875 metres below surface; at Skiråsen, hole SKI-17009 yielded 95.0 metres grading 1.63 g/t gold, including 30.0 metres grading 2.10 g/t gold; SKI-17015 cut seven mineralized zones with highlight hits of 11.0 metres grading 4.18 g/t gold at a midpoint depth of 520 metres below surface plus 22.0 metres grading 1.88 g/t gold and 4.0 metres grading 3.96 g/t gold at a midpoint depth of 615 metres below surface. Hole SKI-17016 yielded 2.43 g/t gold, along a core length of 176.0 metres (333.00 metres to 509.00 metres downhole). At Avan, hole AVA-17034 extended two gold lodes by 150 meters with a best intercept of 12.0 metres grading 2.37 g/t gold. Four diamond drills were operational at that time.

Highlight drill result releases from the final six months of 2018 include: Avan drill hole AVA-18003, that intersected 9.0 meters grading 35.72 g/t gold uncut (5.58 g/t gold cut) at a midpoint depth of 200 metres below surface; hole AVA-18006 cut 24 metres grading 3.76 g/t gold; AVA-18001 cut four gold zones with a best hit of 17.4 metres grading 2.54 g/t gold; AVA-18013 cut 21.0 metres grading 3.68 g/t gold, and AVA-18012 cut 16.0 metres grading 2.76 g/t gold. In the Norra area, NOR18-007 along the Stentjärnen trend, parallel to Avan-Central- Skiråsen zones, cut 3.2 metres grading 2.97 g/t gold. At Skiråsen hole, SKI-18003B yielded 27.0 metres grading 4.12 g/t gold, and SKI-18002 cut six gold zones with a best hit of 9.0 metres grading 3.76 g/t gold and SKI-18003 cut 2.0 metres grading 29.17 g/t gold; SKI-18004 cut nine mineralized intervals including 26.55 metres grading 2.43 g/t gold, plus 5.0 metres grading 4.0 g/t gold, plus 14.0 metres grading 4.97 g/t gold, while SKI-18005 cut 5.0 metres grading 3.35 g/t gold; SKI-18007 intersected five mineralized intervals, including a best intercept of 15.0 metres grading 3.74 g/t gold; SKI-18009 cut 22.0 metres of semi-massive sulphides. At Central, hole CNT-18006 cut 3.0 metres grading 11.12 g/t gold; CNT-18005 cut 5.0 metres grading 4.71 g/t gold, while CNT18007B cut nine mineralized intervals, including 11.0 metres grading 2.30 g/t gold; CNT-18009, cut 57.0 metres grading 1.60 g/t gold and infill drill hole CNT-18008 intersected 58.1 metres grading 1.37 g/t gold; CNT-18012 cut 25.0 metres grading 1.79 g/t gold. At Risberget, hole RIS-18002 cut 9.0 metres grading 1.98 g/t gold.

GOLDSKY RESOURCES CORP. (FORMERLY FIRST NORDIC METALS CORP.)

ANNUAL REPORT TO SHAREHOLDERS

For the Year Ended December 31, 2025

(Expressed in Canadian Dollars)

Description of Business (cont'd...):

BARSELE PROJECT, SWEDEN (cont'd...):

Drilling during 2018 totalled 34,998 metres. Since drilling commenced by Agnico Eagle in late 2015, a total of 135,142 metres of drilling was completed.

On February 21, 2019, the Company announced an updated mineral resource estimate on the Barsele Property with an effective date of February 14, 2019. The study concluded that diamond drilling to date along the Avan-Central-Skiråsen gold zones at a 0.50 g/t gold cut-off for a pit constrained extraction mining method and a 1.50 g/t gold cut-off for a bulk underground extraction mining method and a 1.80 g/t gold cut-off for a selective underground extraction mining method, has in combination, outlined an Inferred Resource of 25,495,000 tonnes grading 2.54 g/t gold (2,086,000 ounces of contained gold) and an Indicated Resource of 5,578,000 tonnes grading 1.81 g/t gold (324,000 ounces of contained gold). Harold Brisson, P. Eng. and Carl Pelletier, P. Geo., B.Sc., both from InnovExplo Inc., of Val d'Or, Quebec assumed responsibility as Qualified Persons for this mineral resource estimate.

On April 2, 2019, the Company announced the filing of the Barsele Gold Project NI 43-101 Technical Report on SEDAR+. The report was prepared in accordance with Canadian Securities Administrators' National Instrument 43-101 standards and a copy of the report may be found under the Company's profile at www.sedarplus.com and on the Company's website at www.goldskyresources.com.

Highlight drill result releases from the first six months of 2019 include: VMS drill holes NOR-19006 cut 3.4 metres grading 9.96 g/t gold, 6.34% zinc, 1.72% copper, 94.61 g/t silver; NOR-19007 cut 5.0 metres grading 5.09 g/t gold, 41.85 g/t silver; NOR-19008 cut 12 metres grading 11.04 g/t gold, 1.44% zinc, 0.29% copper, 74.22 g/t silver; NOR-19009 cut 10.0 metres grading 8.86 g/t gold, 5.17% zinc, 1.51% copper, 78.63 g/t silver.

Highlight drill result releases from the final six months of 2019 include: hole AVA-19007 yielded 1.0-meter grading 6.57 g/t gold and extended the Avan-Central-Skiråsen gold zones, 600 metres to the northwest, for a known strike length approaching 3.6 kilometres. Regional VMS hole AVA-19005 yielded 21.55 metres grading 0.18% zinc, 2.50 g/t silver and Expansion VMS hole NOR19-022 yielded 0.80-meter grading 3.89 g/t gold, 0.12% zinc.

For the 2019-year, drilling at Barsele totaled 12,310 metres in 56 completed core holes. Since assuming management of the Project in 2015, Agnico Eagle has drilled 147,452 metres of overburden penetration and core collection from a total of 367 core holes.

The COVID-19 Pandemic was declared in March of 2020. Proposed plans for the annual exploration campaign were successfully approved by the local Saami Village and sent to the County Administration Board, the Mining Inspectorate, and affected landowners. Between January 1 and April 30, Agnico Eagle personnel and certain contractors performed office related and field specific exploration activities at several exploration sites. Base of till sampling by a contractor continued with 25 holes drilled before the end of June. Ground gravity surveying was carried out by a contractor. Ground magnetic surveying was carried out by Agnico Eagle-site personnel. Plans were made to initiate a large surface till sampling campaign. Recent drilling at the Avan Zone has outlined some new potential lodes that lie parallel and sub-parallel to the current resource. Stringent COVID-19 protocols were enforced to keep workers and people in the surrounding community safe.

GOLDSKY RESOURCES CORP. (FORMERLY FIRST NORDIC METALS CORP.)

ANNUAL REPORT TO SHAREHOLDERS

For the Year Ended December 31, 2025

(Expressed in Canadian Dollars)

Description of Business (cont'd...):

BARSELE PROJECT, SWEDEN (cont'd...):

On July 14th, 2020, the Company announced the resumption of diamond drilling, with two machines. Drilling would test for the continuity and extensions of higher-grade intercepts within and between the Avan and Central zones. In addition, early-stage spectrographic Ore/Waste studies were initiated, with 87 samples collected from the Central Zone trench, as well as select core from the Avan and Skiråsen zones. Water sampling at 18 watercourses and three lakes, plus water flow measurements in 5 creeks is a continuous procedure year over year. Cumulative base of till sampling totaled 156 holes and yielded positive results up to 2.49 g/t gold. Extensive MEFFA surface till sampling combined with automated XRF scanning of 13,758 field samples yielded numerous anomalous responses warranting follow-up and locally yielded several anomalous gold values up to 33 ppb, in an area with strong anomalous arsenic response. A total of 741 gravity stations had measurements collected in 2020. A total of 765 kilometres of magnetic surveying was completed during 2020.

Highlight drill result releases from the final six months of 2020 include: Avan hole AVA-20001 that cut 2.0 metres grading 3.41 g/t gold, plus 5.0 metres grading 2.39 g/t gold; AVA-20002 intersected 11.2 metres grading 5.36 g/t gold; AVA-18003 ext. intersected 5.0 metres grading 84.0 g/t gold, including 0.65 metre grading 647.30 g/t gold; AVA-18004 ext. yielded 11.6 metres grading 3.22 g/t gold, including 0.60 metre grading 30.30 g/t gold and 3.0 metres grading 8.30 g/t gold; AVA-20004 intersected 10.0 metres grading 2.43 g/t gold, including 3.0 metres grading 6.80 g/t gold; AVA-20008 cut 1.0 metre grading 7.80 g/t gold. *At Avan, High-Grade (Bonanza-style) expansion drilling has been successful in probing for 'Fracture Sets' outside the current Wireframe Model and recent drilling has outlined some new Potential Lodes that lie parallel and sub-parallel to the current resource.* At Central, hole CNT-20006 intersected 6.0 metres grading 4.69 g/t gold. At Risberget, RIS-20003 between Skiråsen and Risberget intersected 1.0 metre grading 4.10 g/t gold. Regional "VMS" hole SKL-20001 intersected 0.50 metre grading 3.25% zinc, 0.15% lead and 10.96 g/t silver. Scout drilling at Bastuträsk in 2020 outlined a ~300 metre by ~300 metre area, roughly 4.8 kilometres east-northeast from the Avan-Central-Skiråsen zones requiring follow-up testing. Hole BAS-20007B intersected 0.70 metres grading 32.20 g/t gold, including 0.12% nickel, 0.08% copper and 0.05% cobalt. Hole BAS-20002 intersected 1.65 metres grading 5.80 g/t gold.

Since late 2015, the joint venture completed a total of 155,345 metres of overburden penetration and core collection from a total of 404 drill holes.

On December 16, 2020, the Company filed an amended technical report, entitled "NI 43-101 Technical Report and Mineral Resource Estimate (Amended) for the Barsele Property" (the "**Amended Technical Report**") and an annual information form, for the year ended December 31, 2019 (the "**Amended AIF**"). The Amended Technical Report and the Amended AIF address comments raised by the British Columbia Securities Commission (the "**BCSC**") during a review. The Amended Technical Report contains no material differences from the original technical report filed on April 2, 2019. The Amended AIF incorporates the executive summary from the Amended Technical Report and contains no material differences to the original annual information form for the year ended December 31, 2019, filed on October 28, 2020. The BCSC review is now complete. The report has been prepared in accordance with Canadian Securities Administrators' National Instrument 43-101 and a copy of the report may be found under the Company's profile at www.sedarplus.com and on the Company's website at www.goldskyresources.com

On March 12, 2021, the Company announced that it had executed a non-binding letter of intent ("LOI") with Agnico Eagle to acquire Agnico's indirect 55% interest in the Barsele Project (the "Proposed Transaction"). The Proposed transaction was subject to corporate and regulatory approvals including approval from the TSX Venture Exchange.

GOLDSKY RESOURCES CORP. (FORMERLY FIRST NORDIC METALS CORP.)

ANNUAL REPORT TO SHAREHOLDERS

For the Year Ended December 31, 2025

(Expressed in Canadian Dollars)

Description of Business (cont'd...):

BARSELE PROJECT, SWEDEN (cont'd...):

The LOI provided that the Company and Agnico would negotiate and enter into a definitive purchase and sale agreement containing customary terms and conditions for a transaction of its nature, whereby the Company would acquire Agnico's 55% indirect interest in Gunnarn Mining AB. The purchase price payable by the Company to Agnico would consist of the following:

- (i) a cash payment of US\$45,000,000 (the "Cash Amount"), with the option, at the Company's election, to settle a portion of the Cash Amount through a vendor-take-back note.
- (ii) the issuance of common shares of the Company such that Agnico would hold 14.9% of the Company's common shares upon the closing of the Proposed Transaction (the "Consideration Shares")
- (iii) the issuance of warrants exercisable into 6,000,000 common shares of the Company (the "Warrants"). Each Warrant would have a five-year term and would entitle Agnico to purchase one common share of the Company at an exercise price equal to the greater of:
 - i. \$1.25
 - ii. a 20% premium to the twenty-day volume weighted average price of the Company's common shares immediately prior to the date of issuance of the Warrant, and
 - iii. in the event that the Company issued convertible debt in connection with its financing of the Cash Amount, the conversion price of such convertible debt.
- (iv) a 2% net smelter return royalty on all minerals produced from the Barsele Project (the "NSR"); and
- (v) a contingent value right with respect to future gold mineral reserves and mineral resources identified at the Barsele Project

On June 2, 2021, diamond drilling was resumed at Barsele. Targets tested would include; Orogenic Gold and Massive Sulphide targets, with target selection enhanced through use of geophysics and surface till and basal till sampling. The preliminary ore sorting studies indicated: *Avan-weak, Central-medium, and Skiråsen-good ore sorting potential.*

On November 1, 2021, the Company announced the termination of the LOI in accordance with its terms. The termination of the LOI was the result of difficult market conditions at that time.

On November 10, 2021, the Company announced that effective September 30, 2021, the Swedish Geological Survey has designated the land area hosting the Avan-Central-Skiråsen "Orogenic Gold" system, as well as the land area surrounding the Norra "VMS" deposit, a land and water area of National Interest under Chapter 3, Section 7 of the Swedish Environmental Code (MB). This National Interest area comprises 685 hectares. The National Interest designation of valuable substances or materials serves as a planning instrument and provides guidance to the public and relevant planning authorities that valuable substances or materials of National Importance occur in the area, and consequently must be protected against significant encroachment or restrictions for future mining activities. This is a positive step in an evolving permitting process, with more work to be done.

Highlight drill result releases from the 2021 drilling campaign within the 34,533-hectare property include: Bastutråsk hole BAS-21001 intersected basalt with a 0.90 metre interval grading 1.66% zinc, 0.12% lead; BAS-21004 intersected mainly brecciated basalt and yielded a 0.45 meter intercept grading 1.60 g/t gold; BAS-21005 cut 0.60 metre core length of sphalerite-bearing carbonate breccia, grading 2.93% zinc; BAS-21006 yielded arsenopyrite rich vein material with visible gold and contained a 0.45 metre core length grading 8.20 g/t gold; BAS-21007 cut a zone logged as a mafic dyke, that yielded 0.80 metre core length grading 6.20 g/t gold; BAS-20007B cut massive sulphide/meta gabbro, that yielded 4.00 metres core length grading 0.29 g/t gold, 0.07% nickel, 0.12% copper, plus an andesitic dyke that assayed 1.0 metre grading 1.61 g/t gold. At Norra, NOR-21003, intersected volcanics with banded iron formation at the beginning of the hole, followed by mafic intrusive. Narrow zones of arsenopyrite-bearing mineralization yielded 1.00 metre core length grading 1.03 g/t gold, plus 0.90 metre core length grading 6.10 g/t gold; NOR-21005 cut 1.00 metre

GOLDSKY RESOURCES CORP. (FORMERLY FIRST NORDIC METALS CORP.)

(Expressed in Canadian Dollars)

Description of Business (cont'd...):

BARSELE PROJECT, SWEDEN (cont'd...):

grading 0.75 g/t gold, 22.3 g/t silver, and 0.18% copper, plus anomalous zinc. At Sjöliden, SJO-21001, cut 1.0 metre grading 1.64 g/t gold. At Risberget, RIS-21001 cut 2.0 metres of graphite breccia grading 0.93 g/t gold.

In January 2022, the Company announced that regional exploration at Barsele led to the discovery of a new high-grade gold bearing boulder. A mineralized boulder trail discovered in 2016 and lying to the southeast of the trend of the Avan-Central-Skiråsen zones was followed up by additional work, including MEFFA soil sampling and boulder prospecting in late 2021. Another high-grade boulder assaying 90.8 g/t gold was found about 150 meters up-ice to the northwest of previous boulder discoveries. This new boulder was over one meter in diameter and was subrounded to rounded and composed of quartz-sulphide (mainly pyrrhotite with some arsenopyrite) breccia in fine-grained granodioritic host rock. Preliminary multi element fine fraction analysis of soils indicates discontinuous arsenic anomalies in the area. The possible sources of the boulders could be either the area of the disappearance of the arsenic anomaly approximately 100 meters northwest from the high-grade boulder, or the Barsele gold deposit itself.

On June 7, 2022, the Company announced initiation of what became a 4,252-meter drill campaign in 14 holes. Various targets to be tested included both Orogenic Gold and Massive Sulphide, with target selection enhanced through use of surface mapping and sampling, geophysics, and surface till and basal till sampling. Drilling was planned for Risberget, Avan, Skiråsen, Bastuträsk, and Södra Sundträsket. Drilling was terminated on September 19th.

In mid-January 2023, the Company announced the analytical results from the 2022 diamond drilling campaign. Best results include: Avan Expansion hole AVA-22002 that yielded 8.0 metres grading 2.24 g/t gold, within 11.0 metres grading 1.78 g/t gold. Expansion hole AVA-22003 intersected 3.0 metres grading 1.95 g/t gold. Expansion hole AVA-22004 yielded 1.0 metre grading 10.10 g/t gold, plus 1.0 metre grading 4.70 g/t gold, plus 1.0 metre grading 4.20 g/t gold. At Risberget, Regional hole RIS-22002 cut 3.0 metres grading 2.75 g/t gold.

As of mid-April 2023, ongoing activities by Agnico Eagle personnel included evaluation of the 2022 MEFFA sampling results, plus tabulation of analytical results from the base of till (BOT) winter sampling campaign and firming up plans for the spring BOT campaign, plus ongoing geophysical surveying. All this work was preparatory to a future drilling campaign. In addition, the Barsele personnel have undergone training in fire suppression, first aid, and safe work practises. QA/QC reporting in process with results expected by the end of April.

On June 14th, 2023, the company announced the start what would become a 3,245.5 metre-17-hole drilling campaign. The drill would probe Intrusive-hosted "Orogenic Gold" and "Volcanogenic Massive Sulphides." At Risberget, altered and mineralized zones were encountered in each hole. Subsequently the drill was moved to the Skiråsen area to test a ground magnetic anomaly-a possible source of a high-grade boulder. Results were inconclusive. Drilling was paused for a summer break and resumed on July 24th. The next target tested was the Stentjärn Lake VMS target, hosting strong MEFFA arsenic anomalies in an area of folding of strata, with the drill testing the downward plunge of a potential mineral lineation, like Norra. Subsequently three holes were drilled southeast of Norra. Subsequently, the drill tested the area along the northwesterly trend of the Avan Zone with three holes planned in areas where high-grade gold values have been encountered in prior holes. The Risberget area would next be tested. Drilling terminated September 8th.

On October 4, 2023, the Company provided a preliminary summary of drilling activities. Diamond drilling since 2015 within the 33,466-hectare property totals 165,936.52 metres from 453 drill holes. Drilling was carried out by NTK Drilling of Finland. Five target areas were tested: namely Risberget (4), Skiråsen (1), Norra SE Extension (3), Norra NW Extension (Stentjärn) (2), Avan (4), Risberget North Quarry (3). One Avan hole was abandoned short of target depth.

Description of Business (cont'd...):

BARSELE PROJECT, SWEDEN (cont'd...):

The 2023 drill results outline an extensive, highly significant, volume of altered and mineralized rock that occurs between 2.0 and 2.5 kilometres southeastward, along the same structural corridor as the Avan–Central–Skiråsen gold zones. Hole RIS-23001 intersected strongly albitized andesite, containing gold and arsenopyrite mineralization between 66 and 152 metres down hole. This hole extends the anomalous gold mineralized trend over 250 metres along a north-easterly projection. Assay results include 8.2 metres grading 0.39 g/t Au, 1.0-meter grading 1.49 g/t Au, 4.0 metres grading 0.55 g/t Au, 3.0 metres grading 0.44 g/t Au and 1.0 metre grading 1.21 g/t Au. Hole RIS-23002 intersected a broader and stronger zone of albitized and gold and arsenopyrite mineralized andesite. Gold mineralization occurs between 46 and 97 metres down hole and includes anomalous zones of 12 metres grading 0.40 g/t Au, including 1.0 metre grading 1.24 g/t Au, plus 2.95 metres grading 0.30 g/t Au, plus 2.4 metres grading 0.39 g/t Au plus 5.0 metres grading 0.38 g/t Au. Hole RIS-23003 intersected the strongly altered zone of albitized and gold and arsenopyrite mineralized andesite between 37 and 178 metres down hole. This drill hole tested rock approximately 50 metres beneath hole RIS-23002. The hole cut a discrete zone of arsenopyrite mineralization and quartz veining related to regionally important D-3 brittle ductile deformation. Analysis of the core yielded 4.0 metres grading 0.68 g/t Au, plus 11.0 metres grading 1.12 g/t Au, including 6.0 metres grading 1.8 g/t Au, plus 10.1 metres grading 0.51 g/t Au, plus 1.0 metre grading 1.62 g/t Au. RIS-23004 cut 3.0 metres grading 0.60 g/t gold. RIS-23005 cut 3.0 metres grading 0.57 g/t Au. RIS-23006 cut 0.50 metres grading 0.59 g/t Au. At Skiråsen, hole SKI-23001 cut 4.0 metres grading 5.08 g/t silver, 0.38% zinc, plus 6.8 metres grading 4.2 g/t Ag, 0.12% zinc. At Norra, Holes NOR-23001, NOR-23002, NOR-23003, NOR-23004 and NOR 23-005 did not intersect any anomalous gold or base metals.

At Avan, four holes were drilled to test the northwestward extension of the known wireframed lodes. The drilling partially tested an extension area of 400 metres east-west, by 250 metres north-south. Hole AVA-23001 was drilled southwesterly and hit the favourable granodiorite unit GD-II at 58.0 metres. Visible gold was observed at 142.6 metres, 185.2 metres and 213.2 metres down hole. Favourable quartz veining and arsenopyrite mineralization were observed throughout the entire GD II portion of the hole. This drilling extends the gold mineralized Avan Zone, 300 metres to the northwest from the end of the Avan resource wireframes. Hole AVA-23002 was drilled in a southwesterly direction and intersected massive sulphide rock, in the form of 5-15 percent sulphide mud rock (pyrrhotite) that locally contains 0.5% to 2% sphalerite and/or chalcopyrite, between near surface and 192 metres down hole. Beyond this, the favourable Orogenic Gold GD II granodiorite rock was encountered, and observed to include multiple zones with quartz/arsenopyrite mineralization, with a visible gold occurrence at 267.65 metres. Hole AVA-23003 drilled southwesterly, intersected basalt and dyke rock to 142 metres depth. Beyond this, the hole cut favourable GD II granodiorite, polymetallic breccia with quartz, arsenopyrite, sphalerite and galena to 200 metres down hole. Of the first three Avan holes, this drill hole lies nearest at 75-100 metres from the Avan resource wireframes. Hole AVA-23004 intercepted a strongly sericitized zone containing six intervals with sulphide mineralization and quartz veining, with visible gold and scheelite (often associated with gold) at 12.5 metres depth. The hole was lost at 183 metres, short of the planned depth of 300 metres. At Avan hole AVA-23001 cut 9 gold bearing intervals between 64.0 metres and 215.0 metres with a best hit of 4.0 metres grading 1.52 g/t gold. AVA-23002 cut 13 distinct precious/base metal zones between 29.0 metres and 268 metres, with a best gold hit of 1.0-meter grading 2.03 g/t Au, 8.15 metres grading 0.19% zinc, 3.0 metres grading 0.14% copper. AVA-23003 cut four gold bearing intervals between 169.0 and 218.0 metres with a best hit of 1.0-meter grading 0.92 g/t Au and AVA-23004 cut four gold bearing intervals between 4.0 metres and 180.0 metres with a best hit 1.0-meter grading 2.15 g/t Au.

In early 2024, Agnico Eagle has continued project work at Barsele, preparatory to a summer diamond drilling campaign.

(Expressed in Canadian Dollars)

Description of Business (cont'd...):

BARSELE and GOLD LINE COMBINED PROJECTS, SWEDEN/FINLAND:

On December 13, 2023, the Company, and Gold Line., announced entry into a plan of arrangement agreement dated December 12, 2023, pursuant to which the Company would acquire all the issued and outstanding common shares of Gold Line in exchange for common shares of the Company.

The Transaction would create a company with a leading precious and base metal portfolio of projects underpinned by the advanced stage Barsele gold project, a joint venture with Agnico Eagle Mines Limited.

The Transaction would consolidate a large and prospective gold exploration portfolio in Sweden and Finland that includes a district-scale property package situated along the prolific Gold Line Mineral Belt in Sweden, as well as the Oijärvi gold project located in the Oijärvi Greenstone Belt of Finland. The combined exploration portfolio totals over 104,000 hectares across 41 semi-contiguous exploration permits and will be one of the largest land holdings in Scandinavia.

The Barsele Project lies in the heart of the district with an open pit and underground Indicated Resource of 324 koz gold and an Inferred resource of 2.086 Moz gold. Gold Line's flagship projects, Paubäcken and Storjuktan are located to the immediate south and immediate north of the Barsele Project, and the combined total belt position exceeds 100 kilometres.

The commanding land position will cover the majority of the underexplored and highly prospective Paleoproterozoic Gold Line greenstone belt. This belt is host to the development stage +1 Moz Faboliden deposit, and past-producing Svartliden and Blaiken deposits. Exploration work undertaken by Gold Line on the 100%-owned Paubäcken and Storjuktan projects has continued to demonstrate the potential of the belt, yielding positive drill results. At Paubäcken recent drill results include 22.5 metres of 2.4g/t gold at 45 metres depth and 14.6 metres of 2.5 g/t gold at 142 metres depth. At Paubäcken only 600 metres of a 5.0-kilometre structure has been tested.

In addition, the high grade Oijärvi Project located in the Oijärvi Greenstone Belt of Finland presents a stand-alone belt-scale opportunity for the Company. The Oijärvi Project includes the Kylväkangas gold-silver underground deposit with an Indicated Resource of 159,000 ounces grading 4.6 g/t AuEq and an Inferred Resource of 152,000 ounces grading 2.9 g/t AuEq. (see Appendix, Table 2 for Kylväkangas 2022 NI 43-101 Mineral Resource). The Oijärvi Project was purchased from Agnico Eagle in 2021 and a significant opportunity exists for resource expansion and additional regional discoveries.

This corporate combination will deliver cost efficiencies and will eliminate cost duplication by optimizing resources and providing for more efficient advancement of the combined companies assets as a single portfolio, with a focus on delivering maximum value for shareholders.

The Company announced that it has entered into a definitive agreement dated January 28, 2026 (the "Agreement") with Agnico Eagle Sweden AB ("Agnico Sweden"), a wholly-owned subsidiary of Agnico Eagle Mines Limited ("Agnico Eagle", and together with Agnico Sweden, "Agnico"), pursuant to which the Company has agreed to acquire the remaining 55% interest in the Barsele Gold Project ("Barsele") in Sweden from Agnico (the "Transaction"), resulting in the Company consolidating 100% ownership of Barsele. The Transaction will be affected through the acquisition by the Company of Agnico Sweden's 55% interest in Gunnarn Mining AB ("Gunnarn"). Gunnarn currently owns and operates Barsele pursuant to a joint venture agreement between the Company and Agnico Sweden, which will be terminated in connection with the Transaction. Consideration for the Transaction includes a cash payment of US\$20,000,000 and 75,509,577 common shares of the Company (the "Consideration Shares"). In addition, the Company will grant Agnico Sweden a 2% net smelter return royalty on Barsele (the "NSR"). On closing of the Transaction, the Company will hold a 100% interest in Gunnarn.

(Expressed in Canadian Dollars)

Description of Business (cont'd...):

MAWSON FINLAND ACQUISITION

On December 16, 2025, the Company announced the successful closing of the previously announced acquisition of all of the issued and outstanding common shares of Mawson (the "Mawson Shares") by way of a court-approved plan of arrangement under the *Business Corporations Act* (Ontario) (the "Transaction"). The Transaction, consolidates a large and prospective gold development and exploration portfolio in Sweden and Finland, including the Company's Barsele Project, a joint venture with Agnico Eagle Mines Limited ("Barsele" or the "Barsele Project") and its Gold Line Belt projects in northern Sweden and Oijärvi Project in Finland, and Mawson's Rajapalot Project and surrounding Rompas-Rajapalot Property in northern Finland.

The closing of the Transaction follows the completion of the consolidation of First Nordic's common shares (the "Company Shares") on the basis of four (4) pre-consolidation shares for one (1) post consolidation share, which became effective on December 10, 2025 (the "Consolidation"). All amounts and share numbers referenced in this release are presented on a post-Consolidation basis. In connection with the Transaction, the Company changed its name to Goldsky Resources Corp. ("the Company"), (the "Name Change").

As a result of completion of the Transaction, the Company also received funds from the escrow agent on conversion of the subscription receipts into Company Shares in connection with the previously announced non-brokered and brokered subscription receipt financings for aggregate gross proceeds of \$80 million (the "Concurrent Offerings"). The funds will be used to fund exploration programs across the combined Goldsky portfolio, costs related to the Transaction, and for working capital and general corporate purposes.

Transaction Highlights:

Creating the leading Nordic gold developer and explorer, with a combined group total of 2.0 Moz AuEq¹ in Inferred and 0.3 Moz AuEq¹ in Indicated attributable resource categories. The portfolio includes multiple high-quality assets positioned to achieve near-term development and exploration milestones: Barsele (45% JV ownership); Indicated: 5.58 Mt grading 1.81 g/t Au containing 324,000 oz Au (146,000 oz attributable); Inferred: 25.50 Mt grading 2.54 g/t Au containing 2.09 Moz Au (0.94 Moz attributable) Rajapalot (100% ownership); Inferred Resource: 9.8 Mt at 2.8 g/t Au and 441 ppm Co (0.9 Moz Au / 4,311 t Co) Oijärvi (100% owned); Indicated: 1.07 Mt at 4.1 g/t Au and 35.4 g/t Ag (159 koz AuEq¹); Inferred: 1.63 Mt at 2.7 g/t Au and 15.2 g/t Ag (152 koz AuEq¹) Combined land position of over 123,000 hectares with existing mineral resources and strong exploration potential Extensive exploration upside to be realized through further drilling and exploration Maintains 100% exposure to jurisdictions, focused on Sweden and Finland, with potential for multiple low-cost operations. Critical mineral exposure through cobalt at Rajapalot.

In February, 2026, the Company provided an operational update on its ongoing 2026 winter diamond drilling program at the Company's 100%-owned Rajapalot Gold-Cobalt Project in Northern Finland. The Company has completed 31 drill holes for 6,073 metres of drilling (1,210m NQ2 and 4,863 m HQ), representing approximately 61% of the planned 10,000 metre winter drilling program. Drilling is being conducted with four diamond drill rigs. Three of the drill rigs are focused on a planned 8,000m of infill drilling designed to upgrade confidence of the currently defined Raja and Palokas Au-Co Inferred Resource envelopes, while a fourth rig is conducting target-test drilling on priority regional exploration targets.

The Gold Line and Mawson Finland Acquisition Assets

As part of the acquisition of Gold Line and Mawson Finland, the Company acquired its exploration and evaluation assets. The following tables summarize the capitalized costs associated with the Company's exploration and evaluation assets:

	Gold Line Project	Klippen Gold Project	Oijärvi Gold Project	Rajapalot (Finland)	Total
Acquisition Costs					
Balance, December 31, 2022 and 2023	\$ -	\$ -	\$ -	\$ -	\$ -
Acquisition of Gold Line	3,522,377	844,217	1,855,032	-	6,221,626
Shares issued for mineral property acquisition	-	-	10,063,754	-	10,063,754
Write-down of exploration and evaluation asset	-	(844,217)	-	-	(844,217)
Balance, December 31, 2024	\$ 3,522,377	\$ -	\$ 11,918,786	\$ -	\$ 15,441,163
Acquisition of Mawson Finland	-	-	-	76,016,266	76,016,266
Balance, December 31, 2025	\$ 3,522,377	\$ -	\$ 11,918,786	\$ 76,016,266	\$ 91,457,429

GOLD LINE PROJECT, SWEDEN

As part of the acquisition of Gold Line, the Company acquired its Gold Line Project located in Sweden. The Gold Line Project consist of mineral property licenses in the Gold Line of Northern Sweden and includes the Långtjärn Property, Blåbärliden Property, Paubäcken Property, and the Kankberg Norra Property.

The project was acquired by Gold Line from EMX Royalty Corporation ("EMX") who under the terms of the original agreement will have the right to participate pro-rata in future financings of the Company at its own cost to maintain its interest in Gold Line (the "Pre-Emptive Right") until EMX's interest becomes less than 5%. EMX also received a royalty interest of 3% on the production returns to certain licences and properties of the Gold Line Project. Within six years of April 1, 2019, Gold Line can exercise its right to buy down up to 1% of the royalty owed to EMX (leaving EMX with a 2% royalty interest) by paying EMX 2,500 ounces of gold, or the cash equivalent thereof. Subsequent period end, the Company did not exercise its right to buy down the royalty and the option lapsed. In addition, the following royalty agreements are associated with the Project.

Eurasian Minerals Sweden AB ("EMSAB") Royalty:

Gold Line entered into a royalty agreement with EMSAB dated April 1, 2019, pursuant to which Gold Line is required to pay annual advance royalty (the "Gold Line AAR") payments of 30 ounces of gold on or before April 1, 2022, the third anniversary of the closing date. This royalty payment will then increase by five ounces per year up to a maximum of 75 ounces of gold per year until commencement of commercial production. EMSAB will have an option to receive the AAR payments in gold bullion, a gold bullion cash equivalent, or a value equivalent in shares, subject to certain and agreed upon conditions. During the year ended December 31, 2024, the Company paid \$182,674 (US\$131,856) related to the Gold Line AAR. As at December 31, 2025, the Company accrued \$309,768 (US\$225,647) relating to Gold Line AAR which was paid subsequent to year end.

GOLDSKY RESOURCES CORP. (FORMERLY FIRST NORDIC METALS CORP.)

ANNUAL REPORT TO SHAREHOLDERS

For the Year Ended December 31, 2025

(Expressed in Canadian Dollars)

Description of Business (cont'd...):

GOLD LINE PROJECT, SWEDEN (cont'd...):

AOI Royalty:

Certain additional licenses were staked subsequent to the original agreement with EMX. Per the terms of the original agreement, all licenses staked within the agreed upon area of interest (the "AOI") or subsequently acquired by Gold Line before April 1, 2024 will also be subject to a 1% net smelter return royalty in production from the AOI interest. The Company did not acquire any licences within the AOI before April 1, 2024.

Failure to Comply:

If Gold Line delivers a relinquishment notice to EMX, fails to make the required payment of royalties or annual advance royalties EMX will have the right to demand GLR transfer the Gold Line Project back to EMX for no further consideration.

Paubäcken Project, Sweden

The Paubäcken Project consists of 3 licenses (17,097 ha) that cover the central part of the "Gold Line Belt".

Diamond drilling totaling 670 metres was completed at Paubäcken in early November 2021, with multiple, prioritized drill targets having been defined by exploration in 2020 and 2021. The best result from this drilling program was 22.4m @ 2.4 g/t gold in hole PAU-21-003.

The 2021 drill program focused on the "Aida" target area at Paubäcken, where top of bedrock drilling intersected numerous zones of gold enrichment, including one top of bedrock sample of 3 meters grading 3.9 g/t gold (the entire sampled interval was mineralized). Another > 1 g/t gold top of bedrock sample was also collected from the area, and these zones of documented gold mineralization in bedrock will be targeted in future drill campaigns.

In May 2022 the existing airborne magnetic data was reinterpreted by Perry Eaton. The interpretation identified a clear geophysical trend possibly corresponding to a structural corridor.

A follow up drilling program at the Aida Target was initiated in September 2022 with the aim of expanding on the 2021 results. The program was completed in November 2022 and consisted of 822.15 metres of drilling in 6 holes. The program tested 650 metres of the >5 km Aida structural corridor identified using airborne magnetic geophysics with wide spaced step outs. The 2022 drilling tested down dip and along strike of mineralization encountered in the 2021 discovery hole (22.5 m @ 2.4 g/t Au in PAU-21003). Mineralization is hosted within a sheared and altered mafic volcanic unit located within the structural corridor. Hanging wall and footwall units consist of black shale and greywacke metasedimentary rocks. Mineralization within the volcanic unit has been encountered over 250 metres along strike and remains open to depth and along strike in both directions. Intercepts encountered include 14.55 metres grading 2.44 g/t gold in 2022-AID001, 9.75 metres grading 0.78 g/t Au in 2022-AID002; 3.35 metres grading 1.61 g/t gold and 4.7 metres grading 2.12 g/t gold in 2022-AID-003; and 7.2 metres grading 1.35 g/t gold in 2022-AID-006. Drill hole locations are shown in Figure 1 and a section through PAU-21-003 and 2022-AID-001 is shown in Figure 2.

Drill hole 2022-AID-005 was drilled a further 460 metres along strike to the northwest and encountered 1.0-meter grading 1.04 g/t gold within an alteration envelope of 18 metres grading 0.29 g/t gold. No significant intercepts were encountered in 2022-AID-004 although it did cut into the Aida structural corridor. Mineralization in this area is hosted within a sheared and altered greywacke metasediment.

Initially planned for 1,500 metres, and only testing 800 metres of the structural corridor, the program was cut short due to delays caused by winter weather conditions and expiry of seasonal permit agreements with the Sami Nation to make way for seasonal migration of the reindeer herds.

GOLDSKY RESOURCES CORP. (FORMERLY FIRST NORDIC METALS CORP.)

ANNUAL REPORT TO SHAREHOLDERS

For the Year Ended December 31, 2025

(Expressed in Canadian Dollars)

Description of Business (cont'd...):

GOLD LINE PROJECT, SWEDEN (cont'd...):

Paubäcken Project, Sweden (cont'd...):

Up to December 31, 2021, Gold Line aggressively explored the Paubäcken area with:

- 2,399 surface till/soil samples were collected and analyzed.
- 270-line km of geophysical surveys were completed.
- 185 rock chip samples were collected and analyzed.
- 201 base of till/top of bedrock drill holes were completed.
- 17 channel samples collected.
- 5,200 meters of historic drill core was relogged with 252 additional samples analyzed from the historic drill core.
- 670 metres of diamond drilling

Up to December 31, 2022, the company completed the following exploration work at Paubäcken:

- Reinterpretation of existing airborne magnetic data.
- 3,718 surface till samples collected and analyzed.
- 822.15 metres of diamond drilling on the Aida target structural corridor.

In 2023, exploration at Paubäcken included:

- 1,181 metres in 71 base-of-till (BoT) holes at the Aida Zone, testing for hydrothermal alteration and mineralization along structural corridors. In total, 1.8 kilometres of terrain was tested.

3,050 regional B Horizon till samples collected across 1,350 hectares over a 12-kilometer strike length of the northern extent of the first order Gold Line Belt structural corridor and related second order structures within the Paubäcken exploration permit.

In 2024, exploration at Paubäcken included:

- BoT samples collected through systematic till sampling, which expanded the Harpsund target anomaly to a footprint of approximately 5.5 kilometres by 1 kilometre.
- BoT drilling completed at the Aida target, confirming shallow gold mineralization over 1.5 kilometres within a broader interpreted +4 kilometre corridor. BoT drilling included grades up to 5.01 g/t gold.

On December 31, 2025, the Company announced additional results from its 2025 diamond drill program at the Aida target ("Aida"), located within the Company's 100%-owned Paubäcken project.

Key Highlights:

Multiple strong gold intercepts continue the expansion story at Aida including: 2.30 g/t Au over 9.2 m (2025-AID-014), 2.59 g/t Au over 4.25 m (2025-AID-016), 8.00 g/t Au over 1.55 m (2025-AID-016), 3.12 g/t Au over 5.10 m (2025-AID-019), 4.83 g/t Au over 4.00 m (2025-AID-021), 11.42 g/t Au over 1.45m (2025-AID-027), 1.17 g/t Au over 21.4m and 4.69 g/t Au over 6.0m (both in 2025-AID-037), 2.80 g/t Au over 26.4m (2025-AID-039).

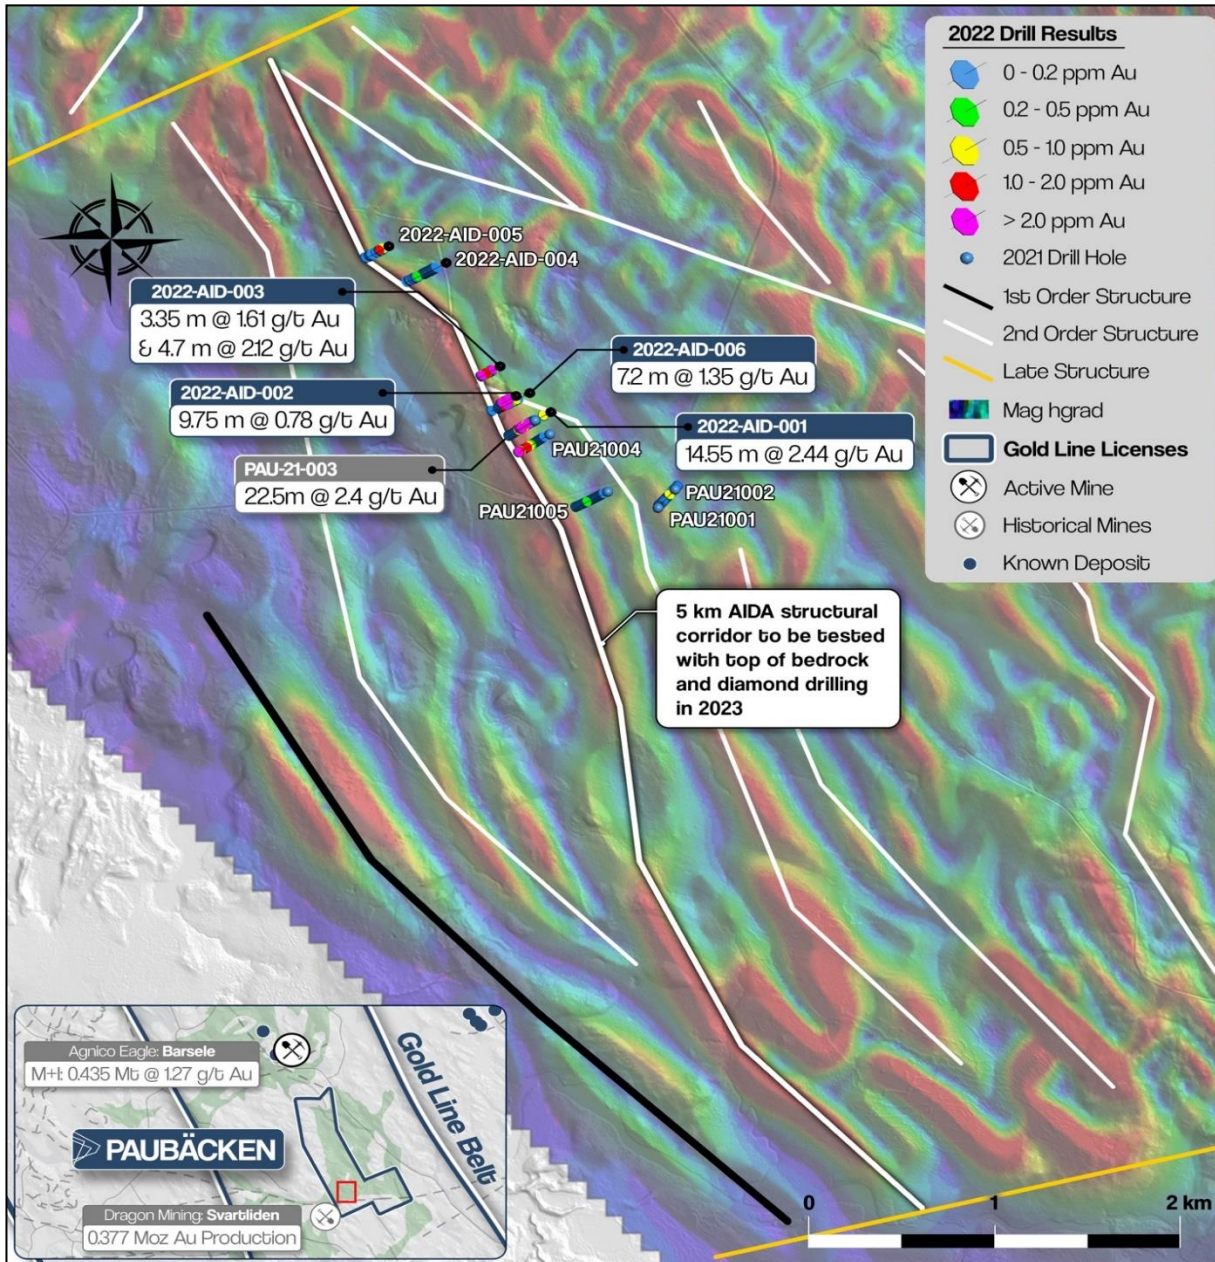

2 new zones identified: the **Radames Zone** on the east side of the Aida Fault Corridor and the **Amneris Zone** on the southwest side of the Aida Corridor. 2.1 km gold-mineralized strike of Aida Corridor infill drilling successful and still remaining open in all directions.

Description of Business (cont'd...):

GOLD LINE PROJECT, SWEDEN (cont'd...):

KLIPPEN GOLD PROJECT, SWEDEN

As part of the acquisition of Gold Line, the Company acquired the Klippen Gold Project. The Klippen Gold Project consists of an exploration license located in the Kingdom of Sweden, of which, Viad Royalties AB (“Viad”) holds a 1% royalty interest.

Viad Royalty:

Gold Line entered into a royalty agreement with Viad dated December 31, 2021, pursuant to which Gold Line is required to pay annual advance royalty (the “Klippen AAR”) payments of one ounce of gold on or before the first anniversary and every anniversary afterwards until the commencement of commercial production. Viad will have an option to receive the AAR payments in gold bullion, a gold bullion cash equivalent, or a value equivalent in shares, subject to certain and agreed upon conditions. During the year ended December 31, 2025, the Company paid \$Nil (December 31, 2024: \$Nil) related to the Klippen AAR. As at December 31, 2025, the Company has accrued a total of \$Nil related to the Klippen AAR (December 31, 2024: \$3,032 (US \$2,189)).

Subsequent to the year ended December 31, 2024, the Company decided not to renew the Klippen claims and accordingly recognized a write-down of exploration and evaluation asset of \$844,217 as at December 31, 2024.

OIJÄRVI GOLD PROJECT, FINLAND

As part of the acquisition of Gold Line, the Company acquired its Oijärvi Gold Project located in central Finland. Gold Line and EMX previously entered into a definitive agreement (the “AEM Agreement”) with Agnico Eagle Mines Limited (NYSE and TSX: AEM; “Agnico”) pursuant to which Gold Line will acquire a 100% interest in Agnico’s Oijärvi Gold Project and the Solvik Gold Project which was impaired by Gold Line during the year ended December 31, 2022 (the “AEM Transaction”). Agnico will retain a 2% net smelter return (“NSR”) royalty on the projects, 1% of which may be purchased at any time by EMX for US\$1,000,000.

Eurasian Minerals Sweden AB (“EMSAB”) Royalty:

Gold Line entered into a royalty agreement with EMSAB dated March 25, 2021, pursuant to which Gold Line is required to pay annual advance royalty (the “Oijärvi AAR”) payments of 30 ounces of gold on or before March 25, 2024, the third anniversary of the closing date. This royalty payment will then increase by five ounces per year up to a maximum of 75 ounces of gold per year until commencement of commercial production. EMSAB will have an option to receive the AAR payments in gold bullion, a gold bullion cash equivalent, or a value equivalent in shares of Gold Line, subject to certain and agreed upon conditions. During the year ended December 31, 2024, the Company paid \$159,840 (US\$115,374) related to the Oijärvi AAR. During the year ended December 31, 2025, the Company accrued \$297,874 (US\$216,983) related to the Oijärvi AAR which was paid subsequent to the year end.

On May 1, 2023, Gold Line entered into an amending agreement to the AEM Agreement (“Amended AEM Agreement”).

In connection with the Amended AEM Agreement, Gold Line issued 1,327,989 common shares (issued) on May 1, 2023 and was required to make a cash payment in the amount of US\$87,500 on or before June 30, 2023 (paid).

GOLDSKY RESOURCES CORP. (FORMERLY FIRST NORDIC METALS CORP.)

ANNUAL REPORT TO SHAREHOLDERS

For the Year Ended December 31, 2025

(Expressed in Canadian Dollars)

Description of Business (cont'd...):

OIJÄRVI GOLD PROJECT, FINLAND (cont'd...):

As a result of the Amended AEM Agreement, total consideration would be US\$10,175,000, comprised of US\$7,087,500 in cash, US\$1,500,000 in common shares of EMX and US\$1,587,500 in common shares of Gold Line, which was required to be paid (or had been paid) to Agnico as follows:

Date	Cash Payments (USD)	EMX Shares (USD)	Gold Line Shares (USD)
Upon TSXV approval	\$750,000 (paid)	\$375,000 (issued)	\$375,000 (issued)
On the first anniversary of the AEM Agreement (March 19, 2022)	\$1,500,000 (paid)	\$500,000 (issued)	\$500,000 (issued)
On the second anniversary of the AEM Agreement (March 19, 2023)	\$87,500 (paid)	-	\$87,500 (issued)
On the third anniversary of the AEM Agreement (March 19, 2024)	\$4,750,000 (not paid)	\$625,000 (not issued)	\$625,000 (not issued)
Total	\$7,087,500	\$1,500,000	\$1,587,500

As part of the AEM Agreement, EMX would receive cash and share payments from the Gold Line as set out in the revised table below, as well as the purchase right of 1% of Agnico's 2% NSR royalty.

Date	Cash Payments (USD)	Gold Line Shares Issued to EMX (USD)
Upon TSXV approval	-	\$375,000 (issued)
On the first anniversary of the AEM Agreement (March 19, 2022)	\$250,000 (paid)	\$250,000 (issued)
On the third anniversary of the AEM Agreement (March 19, 2024)	\$312,500 (not paid)	\$312,500 (not issued)

On July 15, 2024, the Company entered into a subscription agreement with Agnico that will result in Agnico Eagle holding, after giving effect to the transaction, 13.3% of the issued and outstanding common shares of the Company, subject to the receipt of certain regulatory approvals and the satisfaction of other conditions.

Agnico Eagle has agreed to exchange amounts that remained due under the Amended AEM Agreement between certain subsidiaries of the Company, certain subsidiaries of Agnico Eagle and EMX for 27,954,872 common shares of the Company (the "Transaction"). The Transaction is being effected by way of a subscription agreement between the Company and Agnico Eagle. The Transaction provided for the acquisition of the Oijärvi Gold Project ("Oijärvi" or the "Project"). The Oijärvi is a greenstone belt land package that includes the Kylväkangas gold deposit.

On July 31, 2024, the Company completed the Transaction to acquire the Oijärvi Gold Project. The Company issued 27,954,872 common shares to Agnico Eagle at a fair value of \$10,063,754. The common shares were valued using the trading price on the date of issuance.

In connection with the Transaction, Agnico Eagle and the Company entered into an investor rights agreement that provides Agnico Eagle with, among other things, certain rights in the event it maintains minimum ownership thresholds in the Company, including: (i) the right to participate in equity financings; (ii) a top-up right that would permit Agnico Eagle to increase its holdings in the Company to 19.9%; and (iii) the right (which Agnico Eagle has no present intention of exercising) to nominate one person to the Company's board of directors.

ANNUAL REPORT TO SHAREHOLDERS

For the Year Ended December 31, 2025

(Expressed in Canadian Dollars)

Description of Business (cont'd...):

OIJÄRVI GOLD PROJECT, FINLAND (cont'd...):

Oijärvi Reservation Transaction:

On January 21, 2022, in connection with an amended to the Gold Line Project agreement, Gold Line acquired the Oijärvi exploration reservation (the “Oijärvi Reservation”) from EMX. Under the terms of the agreement, EMX also received an uncapped 3% NSR royalty on the Oijärvi Reservation. Within six years of December 31, 2021, Gold Line can exercise its right to buy down up to 1% of the royalty owed to EMX (leaving EMX with a 2% NSR) by paying EMX 2,500 ounces of gold, or the cash equivalent thereof.

EMX will also receive annual advance royalty (the “Oijärvi Extension AAR”) payments of 30 ounces of gold on the Oijärvi Extension Project, commencing on December 31, 2023, the second anniversary of the closing date, until commencement of commercial production, with each Oijärvi Extension AAR payment increasing by five ounces of gold per year, starting from the fourth anniversary, up to a maximum of 75 ounces of gold per year. EMX will have an option to receive the AAR payments in gold bullion, a gold bullion cash equivalent, or a value equivalent in shares of Gold Line, subject to certain and agreed upon conditions. As at December 31, 2025, the Company has paid a total of \$102,886 (US\$74,264) related to the Oijärvi Extension AAR.

In addition, the Oijärvi Reservation would be held by EMX, in trust for Gold Line, until such time as the Oijärvi Reservation has been converted into an exploration permit application (the “Exploration Permit Application”) registered in the name of the Gold Line. The Company submitted its Exploration Permit Application in January 2023, and in January 2024, the Oijärvi Reservation was officially converted into an exploration permit.

Overall Performance

For the year ended December 31, 2025 (“2025”) as compared with the year ended December 31, 2024 (“2024”).

The loss for 2025 increased as compared with the loss for 2024 due to exploration expenditures incurred on Klippen Gold (\$Nil), Oijärvi Gold (\$ 615,830), Gold Line (\$7,651,655) and Barsele JV (\$1,244,300) for a total of \$9,511,785 as compared to exploration expenditures incurred in 2024 on Klippen Gold (\$220,587), Oijärvi Gold (\$366,569), Gold Line (\$699,458) and Barsele JV (\$808,075) for a total of \$2,094,689. In 2025, the Company entered into agreements for consulting and support services which included expenditures incurred in connection with the Company’s early-stage project activities, consulting, business advisory services, strategic planning, project planning, M&A, financial advisory and related strategic and operational support for a total of \$4,373,596 as compared to \$1,366,570 for prior year. During 2025, the Company incurred Investor relations costs for \$1,795,874 as compared to \$1,300,993 in 2024. Investor relations expenses include investor communication and press releases, investor roadshows and conferences, shareholder services, payments to external IR firms or consultants, market awareness and advertising, stock exchange and regulatory fees, and IR related travel and expenses. The Company recognized share-based expense of \$3,882,856 in 2025 as compared with \$2,747,251 in 2024 on vesting of stock options. Office and administrative expenses were \$2,423,286 in 2025 as compared to \$697,481 in 2024 and professional fees for \$685,067 in 2025 as compared to \$405,286 in 2024, as a result of increased business activity and funds availability, being \$97,923,744 raised from financing activities in 2025 as compared to \$16,340,706 raised in 2024. The Company expenses royalty expenses for \$607,642 in 2025 as compared to \$448,432 in 2024. In addition, the Company wrote-off an exploration and evaluation asset, Klippen Gold for \$nil (2024 - \$844,217), which the Company decided to not renew the licences.

GOLDSKY RESOURCES CORP. (FORMERLY FIRST NORDIC METALS CORP.)

ANNUAL REPORT TO SHAREHOLDERS

For the Year Ended December 31, 2025

(Expressed in Canadian Dollars)

Overall Performance (cont'd...)

For the three months ended December 31, 2025 (“Q4/2025”) as compared with the three months ended December 31, 2024 (“Q4/2024”).

The loss for Q4/25 increased as compared with the loss for Q4/24 due to exploration expenditures incurred for a total of \$1,291,652 over four properties as compared to exploration expenditures incurred in Q4/24 for \$1,317,663. In Q4/25, the Company entered into agreements for consulting and support services which included expenditures incurred in connection with the Company’s early-stage project activities, consulting, business advisory services, strategic planning, project planning, M&A, financial advisory and related strategic and operational support for a total of \$1,134,046 as compared to \$221,205 for prior period. During Q4/25, the Company incurred Investor relations costs for \$321,370 as compared to \$213,345 in Q4/24. Investor relations expenses include a) investor communication and press releases; b) investor roadshows and conferences; c) shareholder services; d) payments to external IR firms or consultants; e) market awareness and advertising; f) stock exchange and regulatory fees; and g) IR related travel and expenses. Office and administrative expenses were \$524,864 in Q4/25 as compared to \$404,742 in prior period and professional fees for \$331,949 in Q4/25 as compared to \$201,845 in Q4/24, because of increased business activity and funds availability, being funds raised from financing activities in Q4/25. The Company expenses royalty expenses for \$607,642 in Q4/25 as compared to \$448,432 in Q4/24. In addition, the Company did a write-down of exploration and evaluation asset relating to the Klippen gold project for \$nil (Q4/24 - \$844,217) which the Company decided to not renew the licences.

Results of Operations for the Three-Month Period Ended December 31, 2025 and 2024:

Operating costs totalled \$5,825,128 (2024 - \$3,309,090) for the three-month period ended December 31, 2025. These costs include consulting and support services of \$1,134,046 (2024 - \$221,205), foreign exchange gain of \$439,451 (2024 – gain of \$62,922), general exploration costs for \$1,291,652 (2024 - \$1,317,663), investor relations of \$321,370 (2024 - \$213,345), management fees of \$2,232,971 (2024 - \$393,546), office and administrative fees of \$524,864 (2024 - \$404,742), professional fees of \$331,949 (2024 - \$201,845), royalty expense for \$607,642 (2024-\$448,432), stock-based payments of \$93,221 (2024 - \$66,000) and transfer agent and filing fees of \$52,444 (2024 - \$106,762). In addition, the Company did a write-down of exploration and evaluation asset relating to the Klippen gold project for \$nil (2024 - \$844,217). Operating costs were comparable other than consulting and support services, foreign exchange, investor relations, office and administrative, professional fees, royalty expense, management fees and stock-based payments expense. Consulting and support services increased from \$221,205 in the three months ended December 31, 2024 to \$1,134,046 in the three months ended December 31, 2025 due to increased activity incurred by the Company in the current period for advisory and support services relating to closing the Mawson deal and raising of additional funding. Consulting and support services includes expenditures incurred in connection with the Company’s early-stage project activities, consulting, business advisory services, strategic planning, project planning, M&A, financial advisory and related strategic and operational support. Foreign exchange increased from a gain of \$62,922 in the three months ended December 31, 2024 to \$439,451 gain in the three months ended December 31, 2025 due to fluctuating exchange rate of the Swedish Krona to the Canadian dollar. Investor relations increased from \$213,345 in the three months ended December 31, 2024 to \$321,370 in the three months ended December 31, 2025 due to increased investor relation needs relating to arranging funding. Office and administrative increased from \$404,742 for the three months ended December 31, 2024 to \$524,864 in the three months ended December 31, 2025 due to increase in office and administrative costs to the company and timing of invoices. Professional fees increased from \$201,845 in the three months ended December 31, 2024 to \$331,949 in the three months ended December 31, 2025 due to timing of invoices. Management fees increased from \$393,546 in the three months ended December 31, 2024 to \$2,232,971 in the three months ended December 31, 2025 due to changes in management. Stock-based payments increased from \$66,000 for the three months ended December 31, 2024 to \$93,221 in the three months ended December 31, 2025 due to decrease in options granted in the period.

In summary, the loss in the three-month period ended December 31, 2025, amounted to \$5,825,128 (2024 - \$3,309,090) or \$(0.07) (2024 - \$0.07) per share.

GOLDSKY RESOURCES CORP. (FORMERLY FIRST NORDIC METALS CORP.)**ANNUAL REPORT TO SHAREHOLDERS**

For the Year Ended December 31, 2025

(Expressed in Canadian Dollars)

Results of Operations for the Year Ended December 31, 2025 and 2024:

Operating costs totalled \$28,235,906 (2024 - \$10,020,098) for the year ended December 31, 2025. These costs primarily included consulting and support services for \$4,373,596 (2024 - \$1,366,570), foreign exchange loss of \$65,017 (2024 – gain of \$31,288), general exploration for \$9,511,785 (2024- \$2,094,689), investor relations of \$1,795,874 (2024 - \$1,300,993), management fees of \$5,109,693 (2024 - \$819,533), office and administrative fees of \$2,423,286 (2024 - \$697,481), professional fees of \$685,067 (2024 - \$405,286), royalty expense for \$607,642 (2024-\$448,432), share-based payments of \$3,882,356 (2024 - \$2,747,251) and transfer agent and filing fees of \$249,891 (2024 - \$172,685). In addition, the Company did a write-down of exploration and evaluation asset relating to the Klippen gold project for \$nil (2024 - \$844,217). Operating costs were comparable other than consulting and support services, general exploration, investor relations, office and administrative, professional fees, royalty expense, management fees and share-based payments. Consulting and support services increased from \$1,366,570 in the year ended December 31, 2024 to \$4,373,596 in the year ended December 31, 2025 due to increased activity incurred by the Company in the current period. Consulting and support services includes expenditures incurred in connection with the Company's early-stage project activities, consulting, business advisory services, strategic planning, project planning, M&A, financial advisory and related strategic and operational support. Investor relations increased from \$1,300,993 in the year ended December 31, 2024 to \$1,795,874 in the year ended December 31, 2025 due to increased investor relation needs. Investor relations expenses include a) investor communication and press releases; b) investor roadshows and conferences; c) shareholder services; d) payments to external IR firms or consultants; e) market awareness and advertising; f) stock exchange and regulatory fees; and g) IR related travel and expenses. Professional fees increased from \$405,286 in the year ended December 31, 2024 to \$685,067 in the year ended December 31, 2025 due to increased professional services needs for legal and related services. Management fees increased from \$819,533 in the year ended December 31, 2024 to \$5,109,693 which related to changes in Management during the year. During the year ended December 31, 2025, options were granted and vested resulting in a fair value of \$3,882,356 in share-based payments recognized using the Black-Scholes Model. Share-based payments were \$2,747,251 for the year ended December 31, 2024. These options were issued to directors, officers and consultants.

In summary, the loss in the year ended December 31, 2025, amounted to \$28,235,906 (2024 - \$10,864,315) or \$0.37 (2024 - \$0.22) per share.

The following is a summary of the exploration expenditures for the year ended December 31, 2025.

* On December 16, 2025, the Company consolidated its outstanding share capital on the basis of four (4) pre-consolidated shares for one (1) post consolidated share. All share amounts have been adjusted to reflect the consolidation.

During the three-month period ended December 31, 2025, Operating costs totaled \$5,825,128 and \$8,726,826 during the three months ended September 30, 2025. The reduction in operating expenses was mainly due to lower exploration and consulting and support services in Q4 of 2025 as compared to Q3 of 2025.

During the three-month period ended September 30, 2025, Operating costs totaled \$8,726,826, and \$7,541,522 during the three months ended June 30, 2025. The increase in operating expenses was mainly due to increase in business activity after the capital raises in Q4 of 2024 and Q3 of 2025, adding additional exploration expenditures, management fees and consulting and support services.

During the three-month period ended June 30, 2025, Operating costs totaled \$7,541,522, and \$6,142,430 during the three months ended March 31, 2025. The increase in operating expenses was mainly due to increase in business activity after the capital raise in Q4 of 2024, adding additional exploration expenditures and consulting and support services.

During the three-month period ended March 31, 2025, Operating costs totaled \$6,142,430, and \$3,309,090 during the three months ended December 31, 2024 and a write-down of exploration and evaluation asset totalled \$Nil (December 31, 2024: \$844,217). The increase in operating expenses was mainly due to increase in business activity after the capital raise in Q4 of 2024, adding additional exploration expenditures and consulting and support services.

Selected Quarterly Financial Information: (cont'd...)

During the three-month period ended December 31, 2024, Operating costs totaled \$3,309,090, and \$2,984,331 during the three months ended September 30, 2024 and a write-down of exploration and evaluation asset totalled \$844,217 (September 30, 2024: \$nil). The increase in operating expenses was mainly due to increase in business activity after the capital raise in Q4 of 2024, adding additional exploration expenditures and consulting and support services.

During the three-month period ended September 30, 2024, Operating costs totaled \$2,984,331 and \$3,199,687 during the three months ended June 30, 2024. The minor decrease in expenses was primarily due to timing differences for expenses.

During the three-month period ended June 30, 2024, Operating costs totaled \$3,199,687 and \$526,990 during the three months ended March 31, 2024. The increase in operating expenses was primarily due to stock-based payments granted and vested for \$1,880,619 in the three months ended June 30, 2024.

Liquidity:

The Company is in the exploration stage and commodity prices are not reflected in operating financial results. However, fluctuations in commodity prices may influence financial markets and may indirectly affect the Company.

The loss for the year ended December 31, 2025 is \$28,235,906 (2024 - \$10,864,315), but after changes in other working capital balances, cash used in operating activities was \$22,923,038 (2024 - \$6,813,354).

Total cash used in investing activities due to acquisition of Mawson Finland and Gold Line Resources Ltd. was \$188,046 (2024 - \$86,917).

Cash from financing activities consisted of gross proceeds from a private placement of \$96,819,510 (2024 - \$12,712,728), less share issuance costs paid of \$3,530,774 (2024 - \$984,516), proceeds from an exercise of options of \$1,590,740 (2024 - \$2,040,320), proceeds from warrants exercised of \$2,301,178 (2024 - \$2,785,916), deferred finance cost proceeds for \$53,030 (2024 - expense of \$213,742), proceeds from subscription for shares of \$681,809 (2024 - \$nil) and proceeds from compensatory options exercised of \$8,252 (2024 - \$nil). Total cash received from financing activities was \$97,923,744 (2024 - \$16,340,706).

As a consequence, the Company's cash position increased from an opening level of \$9,568,671 at the beginning of the period to \$84,381,333.

Management believes it will be able to raise equity capital as required in the long term, but recognizes the risks attached thereto. The Company continues to use various strategies to minimize its dependence on equity capital, included the securing of joint venture partners where appropriate.

Capital Resources:

The Company considers its capital structure to be shareholder equity. Management's objective is to ensure that there is sufficient capital to minimize liquidity risk and to continue as a going concern. As an exploration stage company, the Company is unable to finance its operations from cash flow and relies primarily on the funds derived from the spin-out and future equity financings to meet its capital requirements.

There can be no assurance that the Company will be able to obtain adequate financing in the future, or that the terms of such financings will be favourable.

The Company's share capital is not subject to any external restriction and the Company did not change its approach to capital management during the period.

GOLDSKY RESOURCES CORP. (FORMERLY FIRST NORDIC METALS CORP.)

ANNUAL REPORT TO SHAREHOLDERS

For the Year Ended December 31, 2025

(Expressed in Canadian Dollars)

Equity investment - exploration and evaluation assets:

On September 25, 2015, a 45% interest in the Barsele Project which includes Gunnarn Mining AB and Gunnarn Exploration AB (collectively “Barsele JV”) was transferred from Orex Minerals Inc. (“Orex”) to the Company pursuant to a plan of arrangement. The Barsele Project is now a joint venture with Agnico Eagle Mines Limited (“Agnico”). As part of the joint venture agreement, Agnico committed to spend US \$7 million on Project expenditures over three years and can earn an additional 15% interest in Gunnarn Mining AB, which owns the Barsele Project, if it completes a pre-feasibility study.

As Agnico has elected to solely-fund the expenditures on behalf of the Barsele JV until completion of the pre-feasibility study, the Company does not have any responsibility for expenditures or net liabilities of the Barsele JV until such point that Agnico has earned its additional 15% interest. Summarized financial information for the Barsele JV is as follows:

	December 31, 2025		December 31, 2024	
Current assets	\$	259,644	\$	804,727
Non-current assets		7,281,670		6,354,471
Current liabilities		5,552,781		2,609,860
Loss for the year		3,095,339		2,384,202
Comprehensive loss for the year		2,760,834		1,673,462
The Company’s ownership %		45%		45%
The Company’s share of loss for the year	\$	Nil	\$	Nil

As at December 31, 2025 and 2024, the Company’s investment in Barsele JV was \$1. The Company’s unrecognized share of the net loss for the year ended December 31, 2025 was approximately \$1,392,903 (2024 – \$1,072,891). The Company has a minority position on the board of its associated company Gunnarn Mining AB and does not control operational decisions. The Company’s judgment is that it has significant influence, but not control and therefore equity accounting is appropriate.

Exploration expenses reported for the year ended December 31, 2025 of \$ 1,244,301 (2024 - \$808,075) were incurred to meet the Company’s reporting obligations, and to monitor its interest in the Barsele JV, and are non-recoverable.

Related Party Transactions:

During the year ended December 31, 2025, the Company entered into the following transactions with related parties, directors and key management personnel. Key management personnel are individuals responsible for planning, directing and controlling the activities of the Company and include all directors and officers.

Compensation paid or payable to key management personnel for services rendered are as follows:

	Year ended December 31, 2025		Year ended December 31, 2024	
Management fees ^{[1] [2][3] [4] [5]}	\$	4,995,526	\$	819,533
Share based payments		841,305		895,461
Total	\$	5,836,831	\$	1,714,994

^[1] Included in management fees is the settlement amount of \$1,500,000, the Company became obligated to pay to the prior CEO for stepping down in September 2025. This liability was settled, wherein the Company paid \$500,000 and issued 657,894 common shares valued at \$1,000,000.

^[2] Included in management fees is the settlement amount of \$1,250,000, the Company became obligated to pay to the prior officer and director for stepping down in December 2025. This liability was settled, wherein the Company paid \$250,000 during the year ended December 31, 2025, and issued 657,894 common shares valued at \$1,000,000 subsequent to year end.

^[3] Included in management fees is the issuance of 213,088 common shares to the incoming CEO valued at \$396,343.

^[4] Included in management fees is a settlement amount of \$29,500 paid to a prior officer for stepping down.

^[5] Management fees per Statement of Loss includes \$114,167 recognized under ‘Board and management.

GOLDSKY RESOURCES CORP. (FORMERLY FIRST NORDIC METALS CORP.)

ANNUAL REPORT TO SHAREHOLDERS

For the Year Ended December 31, 2025

(Expressed in Canadian Dollars)

Management fees include compensation to:

- Taj Singh (CEO-resigned September 15, 2025)
- Russell Bradford (CEO)
- Adam Cegielski (CDO-resigned December 16, 2025)
- Ross Wilmot (CFO-resigned on May 1, 2025)
- Rakesh Malhotra (CFO)
- John Eren (VP Corporate Development)

Other related party transactions are as follows:

		Year ended December 31, 2025		Year ended December 31, 2024
Investor relations ^[1]	\$	-	\$	49,167
Investor relations		-		19,775
Board and management		114,167		-
Office and administration ^[1]		-		224,316
Exploration expenditures ^[1]		464,800		494,542
Share based payments		915,730		637,113
Total	\$	1,494,697	\$	1,424,913

^[1]Fees paid to a management service company controlled by a director of the Company that provides a corporate secretary, investor relations, a geologist and accounting and administration staff to the Company on a shared cost basis.

Included in accounts payable and accrued liabilities as at December 31, 2025 is \$24,617 (December 2024 - \$683,872) due to directors or officers or companies controlled by directors.

Off Balance Sheet Arrangements:

The Company has no material off balance sheet arrangements in place.

Proposed Transactions:

- a) The Company announced that it has entered into a definitive agreement dated January 28, 2026 (the "Agreement") with Agnico Eagle Sweden AB ("Agnico Sweden"), a wholly-owned subsidiary of Agnico Eagle Mines Limited ("Agnico Eagle", and together with Agnico Sweden, "Agnico"), pursuant to which the Company has agreed to acquire the remaining 55% interest in the Barsele Gold Project ("Barsele") in Sweden from Agnico (the "Proposed Transaction"), resulting in the Company consolidating 100% ownership of Barsele. The Proposed Transaction will be affected through the acquisition by the Company of Agnico Sweden's 55% interest in Gunnarn Mining AB ("Gunnarn"). Gunnarn currently owns and operates Barsele pursuant to a joint venture agreement between the Company and Agnico Sweden, which will be terminated in connection with the Proposed Transaction. Consideration for the Proposed Transaction includes a cash payment of US\$20,000,000 and 75,509,577 common shares of the Company (the "Consideration Shares"). In addition, the Company will grant Agnico Sweden a 2% net smelter return royalty on Barsele (the "NSR"). On closing of the Proposed Transaction, the Company will hold a 100% interest in Gunnarn.

(Expressed in Canadian Dollars)

Changes in Accounting Policies Including Initial Adoption:

Future accounting changes

Effective January 1, 2027, the Company is required to adopt IFRS 18, Presentation and Disclosure in Financial Statements, with early adoption permitted. IFRS 18 will replace IAS 1; many of the existing principles in IAS 1 are retained, with limited changes. IFRS 18 will not impact the recognition or measurement of items in the financial statements, but it might change what an entity reports as its operating profit or loss, in particular additional defined subtotals, disclosures about management-defined performance measures and new principles for aggregation and disaggregation of information. IFRS 18 is accompanied by limited amendments to the requirements in IAS 7, Statement of Cash Flows. The Company is assessing the potential impact of the application of the standards.

Capital Management:

The Company defines its capital as shareholder equity. The Board of Directors does not establish quantitative return on capital criteria for management due to the nature of the Company's business. The Company may invest its capital in liquid investments to obtain adequate returns. The investment decision is based on cash management to ensure working capital is available to meet the Company's short-term obligations while maximizing liquidity and returns on unused capital. The Company does not pay dividends. The Company is not subject to any externally imposed capital requirements.

The Company raises capital to fund its corporate and exploration costs and other obligations through the sale of its common shares or units consisting of common shares and warrants in order to operate its business and safeguard its ability to continue as a going concern. Although the Company management has been successful at raising funds in the past through issuance of share capital, it is uncertain whether it will continue this financing due to uncertain economic conditions. There have been no changes to the Company's approach to capital management during the period.

RISKS AND UNCERTAINTIES

Operational Risk Management

The Company is exposed to numerous risks by virtue of its operations as a mineral explorer, both of an operational and a financial nature. Operational exposures include the risks in acquisition of property rights and access, the actual surface exploration work, surveying the property and sampling, undertaking a drilling program, assaying the drill cores recovered, the evaluation of the results of these determinations and the technical assessments from all of these steps to identify mineralization initially, and then the determination of commercial viability of the mineralization. These various procedures involve the work of staff and consultants or contractors, which introduce risks of damage to the property sites and surrounding areas and harm to those workers involved in the project work. Also, this project work introduces environmental exposures, in particular from drilling, of contamination on site to the air, to the water and to the biodiversity, and equally to the communities in proximity to the project site.

The Company has developed a number of policies to address the ethical elements of its interaction with staff, contractors and communities and its full compliance with governmental laws, rules and guidelines. It has also developed policies addressing Environmental, Social and Governance ("ESG") requirements to guide its staff and others in the conduct of its business on site and elsewhere, and requires all workers to commit regularly to their adherence to the policies.

Climate Change

More recently, the effects of climate change to project work sites has introduced added risk to the success of the site work and the overall viability of the Company's exploration plans. Climate changes can make the project site more difficult for workers due to extreme temperatures or heavy rains or flooding, all adding greater risk of injury or damage. Climate changes can change the costs of fuels and supplies, the availability of water for drilling, and costs for site preparation and maintenance. The impact of climate change has already caused changes to past project work, and there is expected to be future program changes necessitated by additional weather events and changes, which will alter the Company's plans, performance and success going forward.

GOLDSKY RESOURCES CORP. (FORMERLY FIRST NORDIC METALS CORP.)

ANNUAL REPORT TO SHAREHOLDERS

For the Year Ended December 31, 2025

(Expressed in Canadian Dollars)

Financial and Risk Management:

Financial instruments measured at fair value are classified into one of three levels in the fair value hierarchy according to the relative reliability of the inputs used to estimate the fair values. The three levels of the fair value hierarchy are described below.

Level 1 - quoted prices (unadjusted) in active markets for identical assets or liabilities.

Level 2 - inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (i.e., as prices) or indirectly (i.e., derived from prices); and

Level 3 - inputs for the asset or liability that are not based on observable market data (unobservable inputs).

(a) Fair value of financial instruments

The Company has various financial instruments including cash, restricted cash, receivables, accounts payable and accrued liabilities, and subscriptions received in advance. The carrying value of all these financial instruments approximate their fair values due to the short-term maturity of the financial instrument.

(b) Concentrations of business risk

The Company maintains a majority of its cash with a major Canadian financial institution. Deposits held with this institution may exceed the amount of insurance provided on such deposits.

(c) Credit risk

Credit risk is the risk that one party to a financial instrument will cause a financial loss for the other party by failing to discharge an obligation.

The Company's cash is held primarily in a large Canadian financial institution. The Company has not experienced any significant credit losses and believes it is not exposed to any significant credit risk. The Company's receivables are primarily comprised of goods and services tax, which are recoverable from the governing body in Canada.

(d) Liquidity risk

Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they fall due. The Company is exposed to liquidity risk. The Company manages liquidity risk through the management of its capital structure.

(e) Foreign exchange risk

The Company is exposed to foreign currency risk on fluctuations related to cash, receivables, prepaid expenses, amounts payable and accrued liabilities that are denominated in the Swedish krona and the US dollar. A 10% fluctuation in the SEK or USD against the Canadian dollar would not result in any material change in loss for the year ended December 31, 2025.

(f) Interest rate risk

The Company limits its exposure to interest rate risk by holding cash deposits at major Canadian financial institutions and accordingly is not subject to significant interest rate risk.

(g) Price risk

Mineral prices, in particular gold and silver, are volatile. The prices are subject to market supply and demand, political and economic factors, and commodity speculation, all of which can interact with one another to cause significant price movement from day to day and hour to hour. These price movements can affect the Company's ability to operate and to raise financing through the sale of its common shares.

GOLDSKY RESOURCES CORP. (FORMERLY FIRST NORDIC METALS CORP.)

ANNUAL REPORT TO SHAREHOLDERS

For the Year Ended December 31, 2025

(Expressed in Canadian Dollars)

ACQUISITION OF GOLD LINE RESOURCES LTD.

On February 23, 2024, the Company completed the acquisition of all the issued and outstanding common shares of Gold Line whereby each Gold Line shareholder received 0.7382 common shares of the Company in exchange for one common share of Gold Line (the “Arrangement”). Pursuant to the Arrangement, the Company issued 8,936,929 common shares with a fair value of \$4,289,726. Gold Line was a Canadian exploration company listed on the TSX-V and OTC Exchange. On completion of the Arrangement, Gold Line’s common shares were delisted from the TSX-V and OTC Exchange.

As part of the Arrangement, all outstanding share options and warrants of Gold Line were exchanged for share options to acquire up to an aggregate of 387,555 common shares of the Company. All outstanding warrants of Gold Line are exercisable to acquire 3,547,064 common shares of the Company.

The transaction costs associated with the Arrangement totaled \$101,043 and is comprised of legal fees and transfer agent fees.

The acquisition of Gold Line constitutes an asset acquisition and has been accounted for under the acquisition method in accordance with the guidance provided in IFRS 3, Business Combinations (“IFRS 3”). The assets acquired did not qualify as a business according to the definition in IFRS 3, and therefore the acquisition did not constitute a business combination, but rather it is treated as a payment of equity consideration for the acquisition of Gold Line and its net assets. The value of the consideration paid after allocation to the other net assets acquired, was allocated to exploration and evaluation assets, which are located in Sweden and Finland.

The total consideration for the acquisition of the assets and liabilities of Gold Line assumed on acquisition were as follows:

	Total
Cost of acquisition:	
Common shares issued	\$ 4,289,726
Transaction costs	101,043
Value of stock options	126,020
Value of warrants	237,655
Total consideration	\$ 4,754,444
Allocated as follows:	
Cash	\$ 14,126
Receivables	35,403
Prepaid expenses	68,847
Exploration and evaluation assets	6,221,626
Accounts payable	(1,585,558)
	\$ 4,754,444

For the Year Ended December 31, 2025

(Expressed in Canadian Dollars)

ACQUISITION OF MAWSON FINLAND LIMITED

On December 16, 2025, the Company completed the acquisition of all the issued and outstanding common shares of Mawson (the “Transaction”). Pursuant to the terms and conditions of the Arrangement Agreement, the holders of the issued and outstanding Mawson common shares received 1.7884 (or 7.1534 on a pre-consolidation basis) common shares in the capital of the Company (the “Goldsky Shares”) for each one Mawson common share (the “Exchange Ratio”) held immediately prior to closing of the Transaction, which exchange occurred on a post the Consolidation. Pursuant to the Transaction, the Company issued 39,976,326 common shares with a fair value of \$69,958,571. Mawson was a Canadian exploration company listed on the TSX-V. On completion of the Transaction, Mawson’s common shares were delisted from the TSX-V.

As part of the Transaction, all outstanding share options of Mawson were exchanged for share options to acquire up to an aggregate of 1,931,472 common shares of the Company.

The transaction costs associated with the Transaction totaled \$4,770,864 and are comprised of advisory fees, legal fees and transfer agent fees. These costs were settled by issuance of common shares and cash payments.

The acquisition of Mawson constitutes an asset acquisition and has been accounted for under the acquisition method in accordance with the guidance provided in IFRS 3, Business Combinations (“IFRS 3”). The assets acquired did not qualify as a business according to the definition in IFRS 3, and therefore the acquisition did not constitute a business combination, but rather it is treated as payment of equity consideration for the acquisition of Mawson and its net assets. The value of the consideration paid after allocation to the other net assets acquired, was allocated to exploration and evaluation assets, which are located in Finland.

The total consideration for the acquisition of the assets and liabilities of Mawson assumed on acquisition were as follows:

	Total
Cost of acquisition:	
Common shares issued	\$ 69,958,571
Transaction costs	4,770,864
Value of stock options	1,142,444
Total consideration	\$ 75,871,879
Allocated as follows:	
Cash	\$ 691,823

Lease liability	(395,442)
	\$ 75,871,879

GOLDSKY RESOURCES CORP. (FORMERLY FIRST NORDIC METALS CORP.)

ANNUAL REPORT TO SHAREHOLDERS

For the Year Ended December 31, 2025

(Expressed in Canadian Dollars)

Outstanding Share Data:

The Company had 184,327,641 common shares issued and outstanding as of April 30, 2026.

Authorized

Unlimited number of common shares without par value.

Issued

Year ended December 31, 2025

As at December 31, 2025, there were 176,651,231 common shares issued and outstanding on a post consolidation basis. On December 10, 2025, the Company consolidated its outstanding share capital on the basis of four (4) pre-consolidated shares for one (1) post consolidated share.

On March 14, 2025, the Company closed its brokered private placement (the "Private Placement") of Swedish depository receipts ("SDRs") in conjunction with its listing on the Nasdaq First North Growth Market ("Nasdaq First North") in Sweden. SDRs are a financial instrument issued by a Swedish bank representing shares in a non-Swedish company. The Private Placement of SEK 7.5 million was fully subscribed and the full oversubscription allotment of SEK 2.5 million was used. 776,398 SDRs were subscribed for aggregate gross proceeds of SEK 10.0 million (CAD \$1,397,516). Each subscribed SDR is underpinned by one common share of the Company. The Company incurred \$773,424 in share issuance costs.

On July 31, 2025, the Company closed a financing (the "Offering") for aggregate gross proceeds of \$15,422,010. The Offering consisted of the issuance and sale of 10,420,278 units of the Company (the "Units") at a price per Unit of \$1.48 (the "Issue Price"). Each Unit consists of one common share in the capital of the Company and one-half of one common share purchase warrant of the Company (each whole purchase warrant, a "Warrant"). Each Warrant entitles the holder thereof to acquire one common share of the Company at a price of \$2.20 on or before July 31, 2027. In consideration for agency services, the Company issued to the agents 583,663 non-transferable compensation options (the "Compensation Options"). Each Compensation Option is exercisable to acquire one common share of the Company at \$1.48 until July 31, 2027, and incurred expenses of \$1,273,297 as share issuance costs. The Company valued the compensation options at \$405,065.

On December 16, 2025, the Company closed its non-brokered private placement (the "Non-Brokered Private Placement") and its "best efforts" brokered private placement (the "Brokered Private Placement" and together with the Non-Brokered Private Placement, the "Offerings") of subscription receipts raising aggregate gross proceeds of \$80 million.

Pursuant to the Non-Brokered Private Placement, First Nordic issued 44,736,831 subscription receipts (the "Non-Brokered Subscription Receipts") at a price of \$1.52 per Non-Brokered Subscription Receipt (the "Offering Price"), for aggregate gross proceeds of \$67,999,983. Pursuant to the Brokered Private Placement, First Nordic issued a total of 7,894,736 subscription receipts (the "Brokered Subscription Receipts") at the Offering Price, for aggregate gross proceeds of \$12 million. The Company issued 1,164,959 common shares called finders shares valued at \$1,842,965 for its non-brokered subscriptions and incurred expenses of \$1,488,685 as share issuance costs.

During the year ended December 31, 2025, 1,294,092 stock options were exercised for a total consideration of \$1,590,740.

During the year ended December 31, 2025, 2,095,507 warrants were exercised for a total consideration of \$2,301,178.

During the year ended December 31, 2025, 6,252 compensatory options were exercised for a total consideration of \$8,253.

During the year ended December 31, 2025, 870,982 common shares valued at \$1,396,344 were issued for services. Subsequent to December 31, 2025, the Company issued 657,894 common shares valued at \$1,000,000 for services.

GOLDSKY RESOURCES CORP. (FORMERLY FIRST NORDIC METALS CORP.)

ANNUAL REPORT TO SHAREHOLDERS

For the Year Ended December 31, 2025

(Expressed in Canadian Dollars)

Stock Options

The Company has a plan to grant stock options to directors, officers, employees and consultants of the Company. Under the plan, the Board of Directors has the discretion to issue the equivalent of up to 10% of the issued and outstanding shares of the Company from time to time. Stock options are generally for a term of up to five years from the date granted and are exercisable at a price that is not less than the market price on the date granted.

Vesting terms are determined at the discretion of the board of directors. Options issued to consultants providing investor relations services must vest in stages over a minimum of 12 months with no more than one-quarter of the options vesting in any three-month period.

Year ended December 31, 2025

On January 7, 2025, the Company issued 2,222,500 stock options to directors, officers and consultants. The stock options have an exercise price of \$1.56 per share, expire five years from the date of grant and vest immediately. The Company used the Black Scholes option pricing model to estimate the fair value of the options to be \$2,428,373. The following assumptions were used: risk free interest rate of 3.01%, dividend yield of 0%, expected volatility of 90.54% and expected life of 5 years.

On January 20, 2025, the Company issued 250,000 stock options to the Company director. The stock options have an exercise price of \$1.68 per share, expire five years from the date of grant and vest immediately. The Company used the Black Scholes option pricing model to estimate the fair value of the options to be \$289,721. The following assumptions were used: risk free interest rate of 3.01%, dividend yield of 0%, expected volatility of 90.31% and expected life of 5 years.

On May 7, 2025, the Company issued 850,828 stock options to directors, officers and consultants. 775,828 stock options have an exercise price of \$1.80 per share, expire five years from the date of grant and have varying vesting periods. 75,000 options have an exercise price of \$2.80 per share, expire three years from date of grant and vest immediately. The Company used the Black Scholes option pricing model to estimate the fair value of the options to be a total of \$999,344. The Company expensed \$928,005 during the year ended December 31, 2025. The following assumptions were used: risk free interest rate of 2.7%, dividend yield of 0%, expected volatility of 86.94% and expected life of five and three years.

On August 8, 2025, the Company issued 437,500 stock options to directors, officers and consultants. These stock options have an exercise price of \$1.60 per share, expire five years from the date of grant and vest 1/3 immediately and 1/3 annually thereafter. The Company used the Black Scholes option pricing model to estimate the fair value of the options to be a total of \$303,627. The Company expensed \$137,435 during the year ended December 31, 2025. The following assumptions were used: risk-free interest rate of 2.92%, dividend yield of 0%, expected volatility of 85.16 % and expected life of five.

On September 1, 2025, the Company issued 50,000 stock options to a consultant. The stock options have an exercise price of \$1.60 per share, expire six months from the date of grant. The Company used the Black Scholes option pricing model to estimate the fair value of the options to be \$33,122. The following assumptions were used: risk free interest rate of 2.92%, dividend yield of 0%, expected volatility of 85.161% and expected life of 6 months.

On October 16, 2025, the Company issued 25,000 stock options to a consultant. The stock options have an exercise price of \$2.00 per share, expire one year from the date of grant. The Company used the Black Scholes option pricing model to estimate the fair value of the options to be \$65,700. The following assumptions were used: risk free interest rate of 1.92%, dividend yield of 0%, expected volatility of 83.05% and expected life of one year.

The share-based payments expense for stock options granted and vested during the year ended December 31, 2025, was \$3,882,356 (December 31, 2024 - \$2,747,251).

ANNUAL REPORT TO SHAREHOLDERS

For the Year Ended December 31, 2025

(Expressed in Canadian Dollars)

Warrants and Compensatory Options

Year ended December 31, 2025

In connection with a private placement completed in July 2025, the Company issued 5,210,146 warrants. The warrants have an exercise price of \$2.20 per share, expire two years from the date of grant and vest immediately. Under the residual value method, \$nil was attributed to the warrants. The Company also issued 583,663 compensation options. Each Compensation Option is exercisable to acquire one common share of the Company at \$1.48 until July 31, 2027. The Company used the Black Scholes option pricing model to estimate the fair value of the compensation options to be \$0.68. The following weighted average assumptions were used: risk free interest rate of 2.92%, dividend yield of 0%, expected volatility of 85.16% and expected life of 2 years.

Year ended December 31, 2024

In connection with the private placement completed in January and February 2024, the Company issued 1,010,299 warrants. The warrants have an exercise price of \$1.00 per share, expire two years from the date of grant and vest immediately. Under the residual value method, \$nil was attributed to the warrants. The Company also issued 84,742 finders' warrants. The finders' warrants have an exercise price of \$1.00 per share and will expire on January 18, 2026, January 26, 2026 and February 9, 2026 respectively. The Company used the Black Scholes option pricing model to estimate the fair value of the finders' warrants to be \$0.20. The following weighted average assumptions were used: risk free interest rate of 4.24%, dividend yield of 0%, expected volatility of 89.95% and expected life of 2 years.

On February 23, 2024, the Company issued 3,547,064 warrants to previous option holders of Gold Line Resources Ltd. in accordance with the Arrangement. The warrants are exercisable at an average of \$2.80 per share and will expire on September 14, 2024, January 31, 2025, April 28, 2025 and October 27, 2025 respectively. The warrants were all fully vested on acquisition date. The Company used the Black Scholes option pricing model to estimate the fair value of the warrants to be \$237,655. The following weighted average assumptions were used: risk free interest rate of 4.23%, dividend yield of 0%, expected volatility of 101.55% and expected life of 1.1 years.

On July 8, 2024, the Company issued 787,658 warrants under the Warrant Incentive Program. The warrants have an exercise price of \$1.60 per share, expire two years from the date of grant and vest immediately. Under the residual value method, \$nil was attributed to the warrants.

On July 29, 2024, the Company issued 221,820 warrants under the Warrant Incentive Program. The warrants have an exercise price of \$1.60 per share, expire two years from the date of grant and vest immediately. Under the residual value method, \$nil was attributed to the warrants.

On November 26, 2024, the Company issued 522,744 compensatory options to underwriters. The compensatory options have an exercise price of \$1.32 per share, expire two years from the date of grant and vest immediately. The Company used the Black Scholes option pricing model to estimate the fair value of the compensatory options to be \$296,410. The following assumptions were used: risk free interest rate of 3.23%, dividend yield of 0%, expected volatility of 91.12% and expected life of 2 years.

In connection with the private placement closed in November 2024, the Company issued 4,353,200 warrants. The warrants have an exercise price of \$1.80 per share, expire two years from the date of grant and vest immediately. Under the residual value method, \$522,744 was attributed to the warrants.

GOLDSKY RESOURCES CORP. (FORMERLY FIRST NORDIC METALS CORP.)

ANNUAL REPORT TO SHAREHOLDERS

For the Year Ended December 31, 2025

(Expressed in Canadian Dollars)

Subsequent Events:

- a) The Company announced that it has entered into a definitive agreement dated January 28, 2026 (the "Agreement") with Agnico Eagle Sweden AB ("Agnico Sweden"), a wholly-owned subsidiary of Agnico Eagle Mines Limited ("Agnico Eagle", and together with Agnico Sweden, "Agnico"), pursuant to which the Company has agreed to acquire the remaining 55% interest in the Barsele Gold Project ("Barsele") in Sweden from Agnico (the "Proposed Transaction"), resulting in the Company consolidating 100% ownership of Barsele. The Proposed Transaction will be affected through the acquisition by the Company of Agnico Sweden's 55% interest in Gunnarn Mining AB ("Gunnarn"). Gunnarn currently owns and operates Barsele pursuant to a joint venture agreement between the Company and Agnico Sweden, which will be terminated in connection with the Proposed Transaction. Consideration for the Proposed Transaction includes a cash payment of US\$20,000,000 and 75,509,577 common shares of the Company (the "Consideration Shares"). In addition, the Company will grant Agnico Sweden a 2% net smelter return royalty on Barsele (the "NSR"). On closing of the Proposed Transaction, the Company will hold a 100% interest in Gunnarn.
- b) On February 19, 2026, the Company announced the closing of the acquisition of the Nordic business unit ("NBU Acquisition") of Elemental Royalty Corporation (previously operating as EMX Royalty Corporation ("Elemental")). Pursuant to the terms of the NBU Acquisition agreement dated May 30, 2025 (the "Agreement"), the Company is making staged payments totaling 3,247,000 SEK (US\$360,000), with each payment paid half in cash and half in the Company's common shares ("Shares"), as follows:
 - 1,052,000 SEK following TSX-V approval (paid by the issuance of 20,138 common shares and SEK 526,000 (US\$58,825) in cash)
 - 1,195,000 SEK (US\$132,200) on the first anniversary of closing; and
 - 1,000,000 SEK (US\$110,600) on the second anniversary of closing.

The deemed issue price of the Company's common shares to be issued will be the greater of \$1.26 and the volume weighted average price of the Company's shares over the 10 consecutive trading days preceding the issue date, provided that, if and to the extent any issuance of the Company's shares causes Elemental's ownership of the Company's shares to exceed 9.9% of the then issued and outstanding shares, the dollar value of such excess portion of the Company's shares not issued shall instead be satisfied by the Company making an equivalent cash payment.

Elemental will retain a 1% net smelter return (NSR) royalty on any new projects organically generated (i.e. newly staked) by the Company in Sweden and Finland within five years of the effective date of the Agreement.

- c) On January 29, 2026, the Company granted 8,090,000 stock options to directors, officers and consultants. The options were issued at an exercise price of \$4.10 with an expiry of 5 years. These options vested immediately.
- d) On March 2, 2026, the Company granted 500,000 stock options to an officer of the Company. These options were issued at an exercise price of \$4.22 with an expiry of 5 years. These options vested immediately.
- e) After the year ended December 31, 2025, the Company completed the settlement with the outgoing officer and director. The Company issued 657,894 common shares valued at \$1,000,000.
- f) After the year ended December 31, 2025, 2,906,597 options were exercised for proceeds of \$3.9 million.
- g) After the year ended December 31, 2025, 2,466,291 warrants were exercised for proceeds of \$2.4 million and 665,326 compensatory options for proceeds of \$0.9 million.
