An Emerging Nordic Gold Developer

November 2026

GOLDSKY
RESOURCES

Disclaimer

This management presentation (this "presentation") is dated April 8, 2026 and has been prepared by Goldsky Resources Corp. (formerly First Nordic Metals Corp.) ("Goldsky") based on information available to Goldsky at the time of preparing this presentation. This presentation has been prepared following Goldsky's entry into a definitive agreement with Agnico Eagle Sweden AB ("Agnico Sweden"), a wholly-owned subsidiary of Agnico Eagle Mines Limited ("Agnico Eagle", and together with Agnico Sweden, "Agnico"), pursuant to which Goldsky has agreed to acquire the remaining 55% interest in the Barsele Gold Project ("Barsele") in Sweden from Agnico (the "Transaction"), resulting in Goldsky consolidating 100% ownership of Barsele. As of the date hereof, the Transaction has not closed but is expected to close during Q2, 2026.

No representation or warranty, express or implied, is made as to the fairness, accuracy, completeness or correctness of the information, opinions and conclusions contained in this presentation.

To the maximum extent permitted by law, none of Goldsky or its directors, employees or agents, advisers, nor any other person accepts any liability, including, without limitation, any liability arising from fault or negligence on the part of any of them or any other person, for any loss arising from the use of this presentation or its contents or otherwise arising in connection with it.

Not an Offer
This presentation is not an offer, invitation, solicitation or other recommendation with respect to the subscription for, purchase or sale of any security, and neither this presentation nor anything in it shall form the basis of any contract or commitment whatsoever.

This presentation has been prepared in accordance with applicable Canadian securities laws and may not be released to US wire services or distributed in the United States. This presentation does not constitute an offer to sell, or a solicitation of an offer to buy, securities in the United States or any other jurisdiction. Any securities described in this presentation have not been, and will not be, registered under the US Securities Act of 1933, as amended (the “US Securities Act”) and may not be offered or sold in the United States except in transactions registered under the US Securities Act or exempt from, or not subject to, the registration of the US Securities Act and applicable US state securities laws.

Not Investment Advice
This presentation does not purport to be complete or to contain all of the information a reader may require about Goldsky following completion of the Transaction and its business or prospects. Neither Goldsky nor any of its representatives or affiliates make any representation or warranty as to the accuracy, reliability, reasonableness or completeness of this information and shall not have any liability for any representations regarding information contained in, or for any omission from, this presentation or any other written or oral communications transmitted to the reader except as required by law. The information contained in this presentation is not investment or financial product advice and is not intended to be used as the basis for making an investment decision. A reader is directed to all of Goldsky’s publicly filed documentation and information which can be found under its corporate profile on SEDAR+ at www.sedarplus.ca.

Confidentiality
Securities legislation in all provinces and territories of Canada prohibits unauthorized distribution of the information contained in this presentation. Each recipient of the information contained in this presentation will treat such information in a confidential manner and will not, directly or indirectly, disclose or permit its affiliates or representatives to disclose such information to any other person or reproduce this presentation, in whole or in part, without the prior written consent of Goldsky.

Technical Reports and Qualified Persons

This presentation includes disclosure of scientific and technical information concerning the Goldsky mineral projects from technical reports ("technical reports") prepared in accordance with Canadian NI 43-101 - Standards of Disclosure for Mineral Projects ("NI 43-101"). The technical reports, which are described below, are available on SEDAR+ (www.sedarplus.ca) under Goldsky’s profile or that of its wholly-owned subsidiaries, Mawson Finland Limited and Gold Line Resources Ltd., as applicable. Readers are cautioned to review the following technical reports in full:

- For further information regarding the Barsele project, reference should be made to the following NI 43 - 101 technical report titled "Amended NI 43-101 Technical Report and Mineral Resource Estimate for the Barsele Project” with an effective date of February 21, 2019, and a signature date of December 16, 2020 prepared.
- For further information regarding the Kylmäkangas project, reference should be made to the following NI 43-101 technical report titled "NI 43-101 technical report and mineral resource estimate for the Kylmäkangas Gold Project" with an effective date of July 25, 2022.
- For further information regarding the Langtjärn project, reference should be made to the following NI 43-101 technical report titled "NI 43- 101 technical report and mineral resource estimate for the Längtjärn property" with an effective date of June 30, 2020.
- For further information regarding the Rajapalot Gold -Cobalt project, reference should be made to the following NI 43-101 technical report titled “NI 43-101 Technical Report on a Preliminary Economic Assessment of the Rajapalot Gold-Cobalt Project, Finland” with an effective date of December 19, 2023.

The technical and scientific information in this presentation was reviewed, prepared, and approved by Benjamin Gelber, a practicing Professional Geologist (P.Geo) registered with Engineers & Geoscientists British Columbia (EGBC, Licence No. 3325), who is a “Qualified Person” as defined by NI 43-101. Mr. Gelber is independent of Goldsky within the meaning of NI 43-101.

Mineral Resources
This presentation contains references to estimates of mineral resources. The estimation of mineral resources is inherently uncertain and involves subjective judgments about many relevant factors. Mineral resources that are not mineral reserves do not have demonstrated economic viability. The accuracy of any such estimates is a function of the quantity and quality of available data, and of the assumptions made and judgments used in engineering and geological interpretation, which may prove to be unreliable and depend, to a certain extent, upon the analysis of drilling results and statistical inferences that may ultimately prove to be inaccurate. Mineral resource estimates may require re-estimation based on, among other things: (i) fluctuations in the price of gold, silver and other metals; (ii) results of drilling; (iii) results of metallurgical testing, process and other studies; (iv) changes to proposed mine plans; (v) the evaluation of mine plans subsequent to the date of any estimate; and (vi) the possible failure to receive required permits, approvals and licenses.
These mineral resource estimates include inferred mineral resources that are normally considered too speculative geologically to have economic considerations applied to them that would enable them to be categorized as mineral reserves. There is also no certainty that these inferred mineral resources will be converted to measured and indicated categories through further drilling, or into mineral reserves, once economic considerations are applied.

Forward-Looking Statements
Certain statements in this presentation are "forward-looking statements", including within the meaning of applicable laws. All statements other than statements of historical fact included in this presentation, including, statements regarding closing of the Transaction, future plans at Barsele, the effect of the Transaction on Goldsky's resources, gold grades, metallurgies, business, prospects, operations and future plans and objectives of Goldsky are forward - looking statements based on forecasts of future operational or financial results, estimates of amounts not yet determinable and assumptions of management that involve various risks and uncertainties, as well as Goldsky’s corporate strategies, including additional acquisitions, and plans for future exploration. Any statements that express or involve discussions with respect to predictions, expectations, beliefs, plans, projections, objectives, assumptions or future events or performance (often, but not always, using words or phrases such as "expects" or "does not expect", "is expected", "anticipates" or "does not anticipate", "plans", "estimates" or "intends", or stating that certain actions, events or results "may", "could", "would", "might", or "will" be taken, occur or be achieved) are not statements of historical fact and may be "forward-looking statements." Goldsky cautions that forward-looking statements involves known and unknown risks, uncertainties and other factors that may cause actual results, performance or achievements to be materially different from those expressed or implied by such information, including, but not limited to, failure to obtain the necessary regulatory and other approvals; gold and silver price volatility; fluctuations in foreign exchange rates and interest rates; the impact of any hedging activities; discrepancies between actual and estimated production, between actual and estimated reserves and resources or between actual and estimated metallurgical recoveries; capital expenditure requirements; and the success of exploration and permitting activities.

Although Goldsky has attempted to identify important factors that could cause actual results, performance or achievements to differ materially from those contained in forward-looking statements, there can be other factors that cause results, performance or achievements not to be as anticipated, estimated or intended. There can be no assurance that such information will prove to be accurate or that management's expectations or estimates of future developments, circumstances or results will materialize. Accordingly, readers should not place undue reliance on forward-looking statements. Subject to any continuing obligations under applicable law or any relevant stock exchange listing rules, in providing this information, Goldsky does not undertake any obligation to publicly update or revise any of the forward-looking statements or to advise of any change in events, conditions or circumstances.

Market Data
Market data and other statistical information used throughout this presentation are based on internal research by Goldsky, independent industry publications, government publications, reports by market research firms or their published independent sources. Industry publications, governmental publications, market research surveys and forecasts generally state that the information contained therein has been obtained from sources believed to be reliable. Although Goldsky believes such information is accurate and reliable, neither has independently verified any of the data from third party sources cited or used for industry estimates used in this presentation, nor has Goldsky ascertained the underlying economic assumptions relied upon therein. While Goldsky believe internal estimates are reliable, such estimates have not been verified by any independent sources, and Goldsky makes no representations as to the accuracy of such estimates.

1Gold equivalent calculation used for Oijärvi, Kylmäkangas project:
AuEq. = Au grade + (Ag grade *(Ag price/Au price))
The prices are based on the May 31, 2022 Long-Term CIBC consensus pricing for precious metals of US$1,657/oz Au and US$21.52/oz Ag

Investment Highlights

Multi-million-ounce gold resources base across Sweden and Finland

C$52M treasury to fund growth, drilling and development

Access to carbon neutral power and established project infrastructure

Proven management team with mine development expertise

We are the new Nordic gold developer

An Emerging Gold Developer in the Nordics

Introduction

- Goldsky launched in December 2025
- New management and board **with long track record** of creating shareholder value
- Projects: **Barsele (Sweden)** & **Rajapalot (Finland) with combined 3.6 million ounces MI&I**
- Became 100% owner of Barsele Project via transaction with Agnico Eagle who now hold 32.5% of Goldsky
- **Fully funded** with cash of **C$52m in treasury**
- Market cap of **C$688m** and listed on TSXV & FNSE

Corporate Highlights

Analyst Coverage

Hannam&Partners · cg/ Canaccord Genuity · Desjardins · STIFEL

Sweden’s Largest Undeveloped Gold Deposit

Key Barsele Project Metrics

- Granodiorite hosted orogenic gold deposit
- **Favorable geometry**: 5-160m wide zones
- **Metallurgy:** simple free-milling metallurgy (93-96% recovery)
- The Geological Survey of Sweden (SGU) designated Barsele in 2021 as a national interest for mining purposes. The Gold line belt was in 2026 designated as an area of significance for exploration
- Awarded both exploration and exploitation permits

2018 Resource Statement

Indicated	7 882 378	1.27	320 781

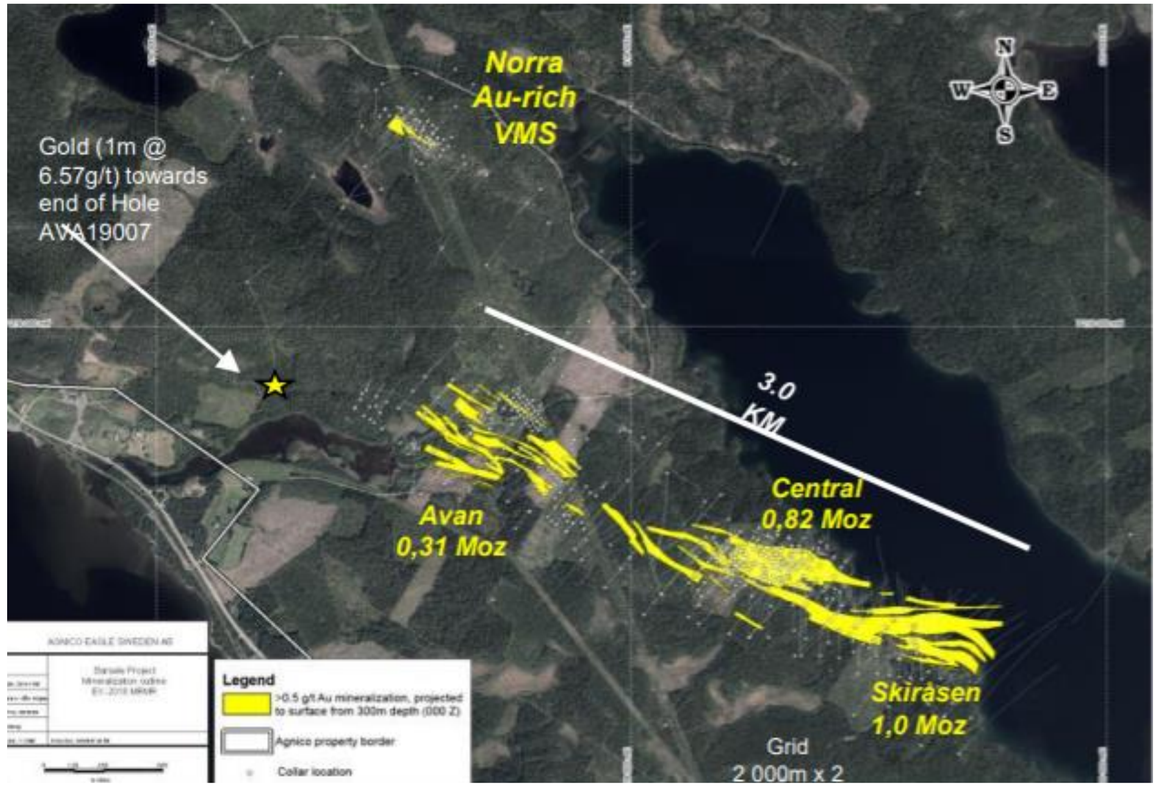
Open Pit COG 0.4 g/t Au
UG Semi-Bulk COG 1.20 g/t Au
UG Selective COG 1.66 g/t Au
Gold price 1,533US$
* AEM owns 55%

Current resource covers > 3.5km of lateral strike continuation



Goldsky: the dedicated developer of the Barsele project

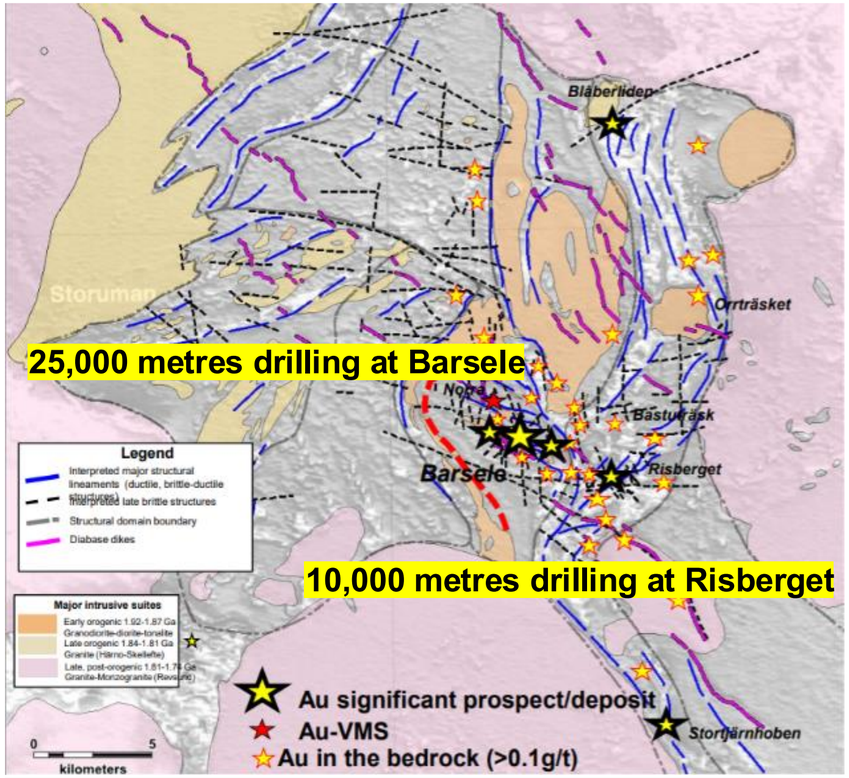
A Mature Project Site with Multiple Identified Gold Targets

Historic Agnico exploration activity 2015-2025

- 174,509m drilled
- 478 holes drilled
- 454m avg depth
- 58,487 soil samples
- 1,786 BOT holes
- 122,777 assays
- 2,639km ground Mag survey

Significant historic work provides strong foundation for future workplans

Exposed mineralization



Barsele regional exploration targets

Barsele sits in the centre of Goldsky's large licence area on Sweden's Gold Line Belt

The Gold Line Belt | Multi-kilometer long Orogenic Gold System

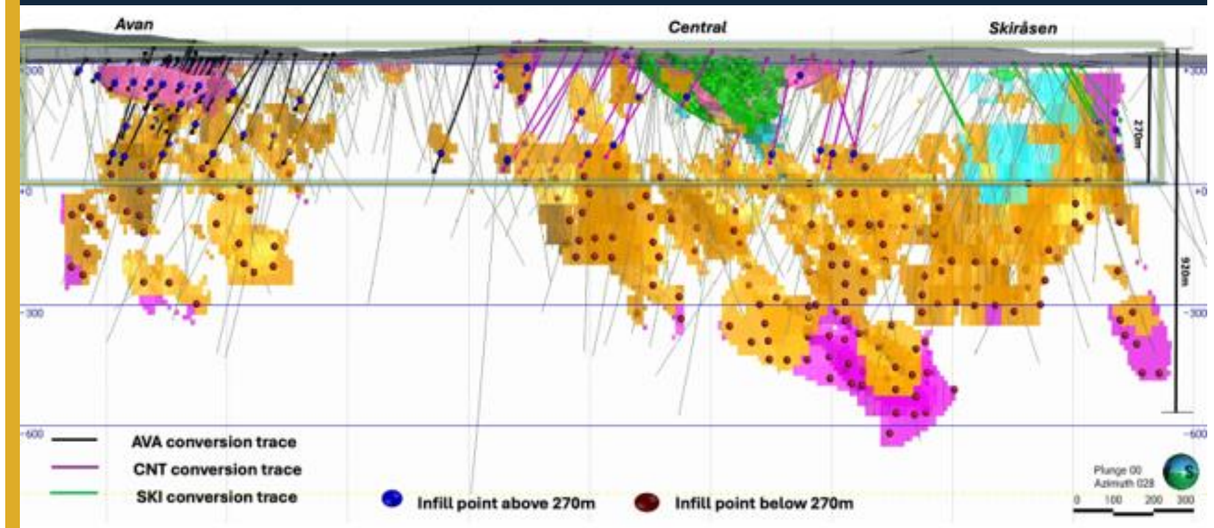
- Goldsky owns the licence's immediately north and south of Barsele
- The Paubäcken project is a 17,097 ha land package
- 2025 drilling program: 33 of 39 holes confirmed gold-bearing structures; VG in 7 holes
- Goldsky's Barsele acquisition consolidated the 'Gold Line Belt'
- The Gold line belt was designated in 2026 as an area of significance for exploration

Barsele Drilling Program 2026 / 2027

- 25,000-meter campaign underway aimed at upgrading and extending the Mineral Resource at the Barsele deposit
- This marks Goldsky's first drilling program at Barsele since the transaction for 100% ownership which closed in June 2026
- Drilling will focus on Skiråsen, Central and Avan zones, where the existing Mineral Resource remains open both along strike and at depth
- 3 rigs now mobilized at Barsele; 2 Comadev, 1 Arctic Drilling Company by end of October

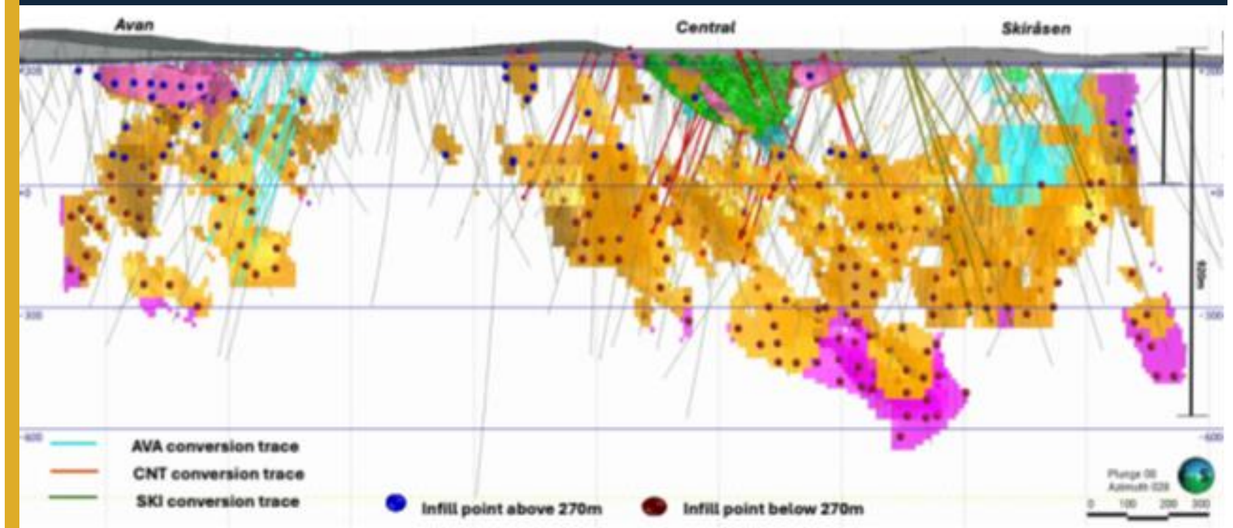
Barsele Drilling Program - short hole and long hole drilling

Conversion drill plan shallow targets (openpit-Option-45m Buffer): Verical depth = 270m



Shallow hole drilling to 270m depth

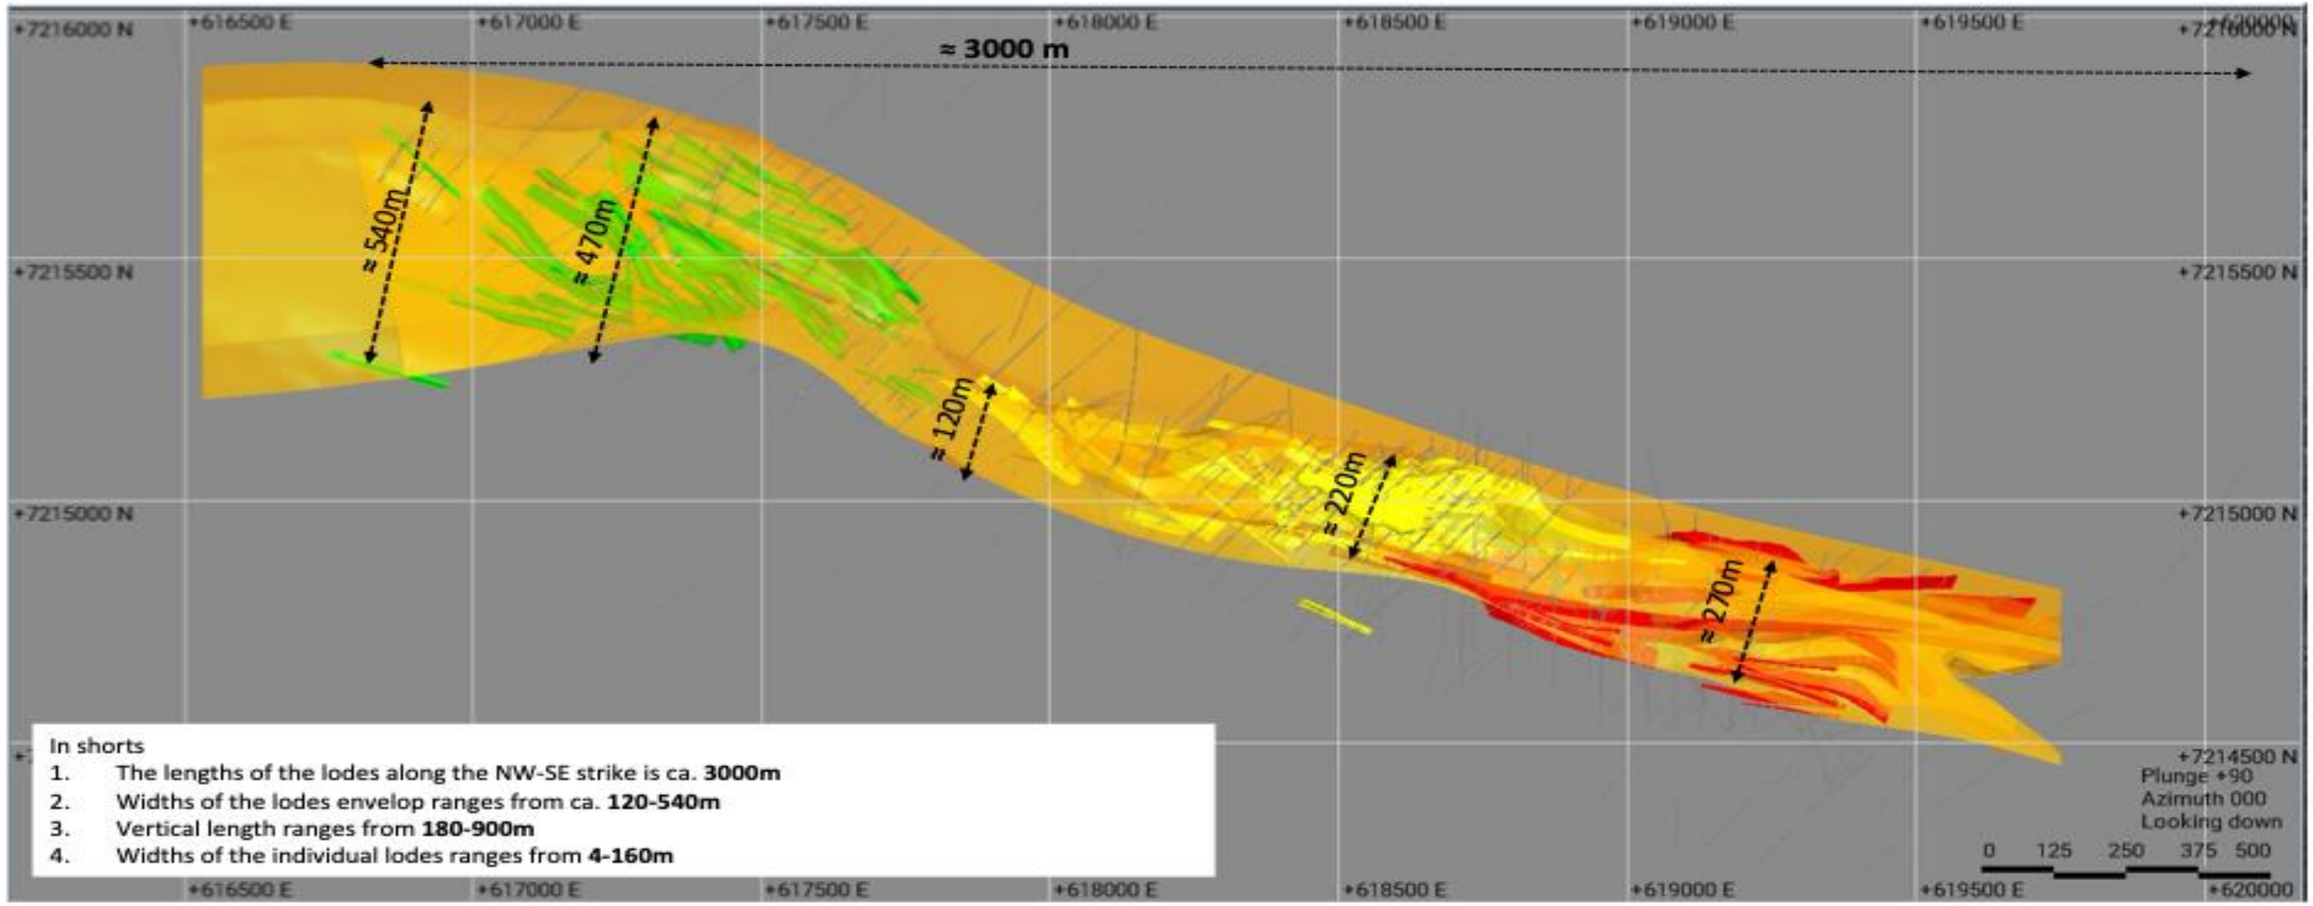
Conversion drill plan Deep targets (infill/Expansion): Verical depth = below 270m



Deep target drilling below 270m depth

Barsele Orebody

CAS Width of the lodes envelop; ranges from 120-540m

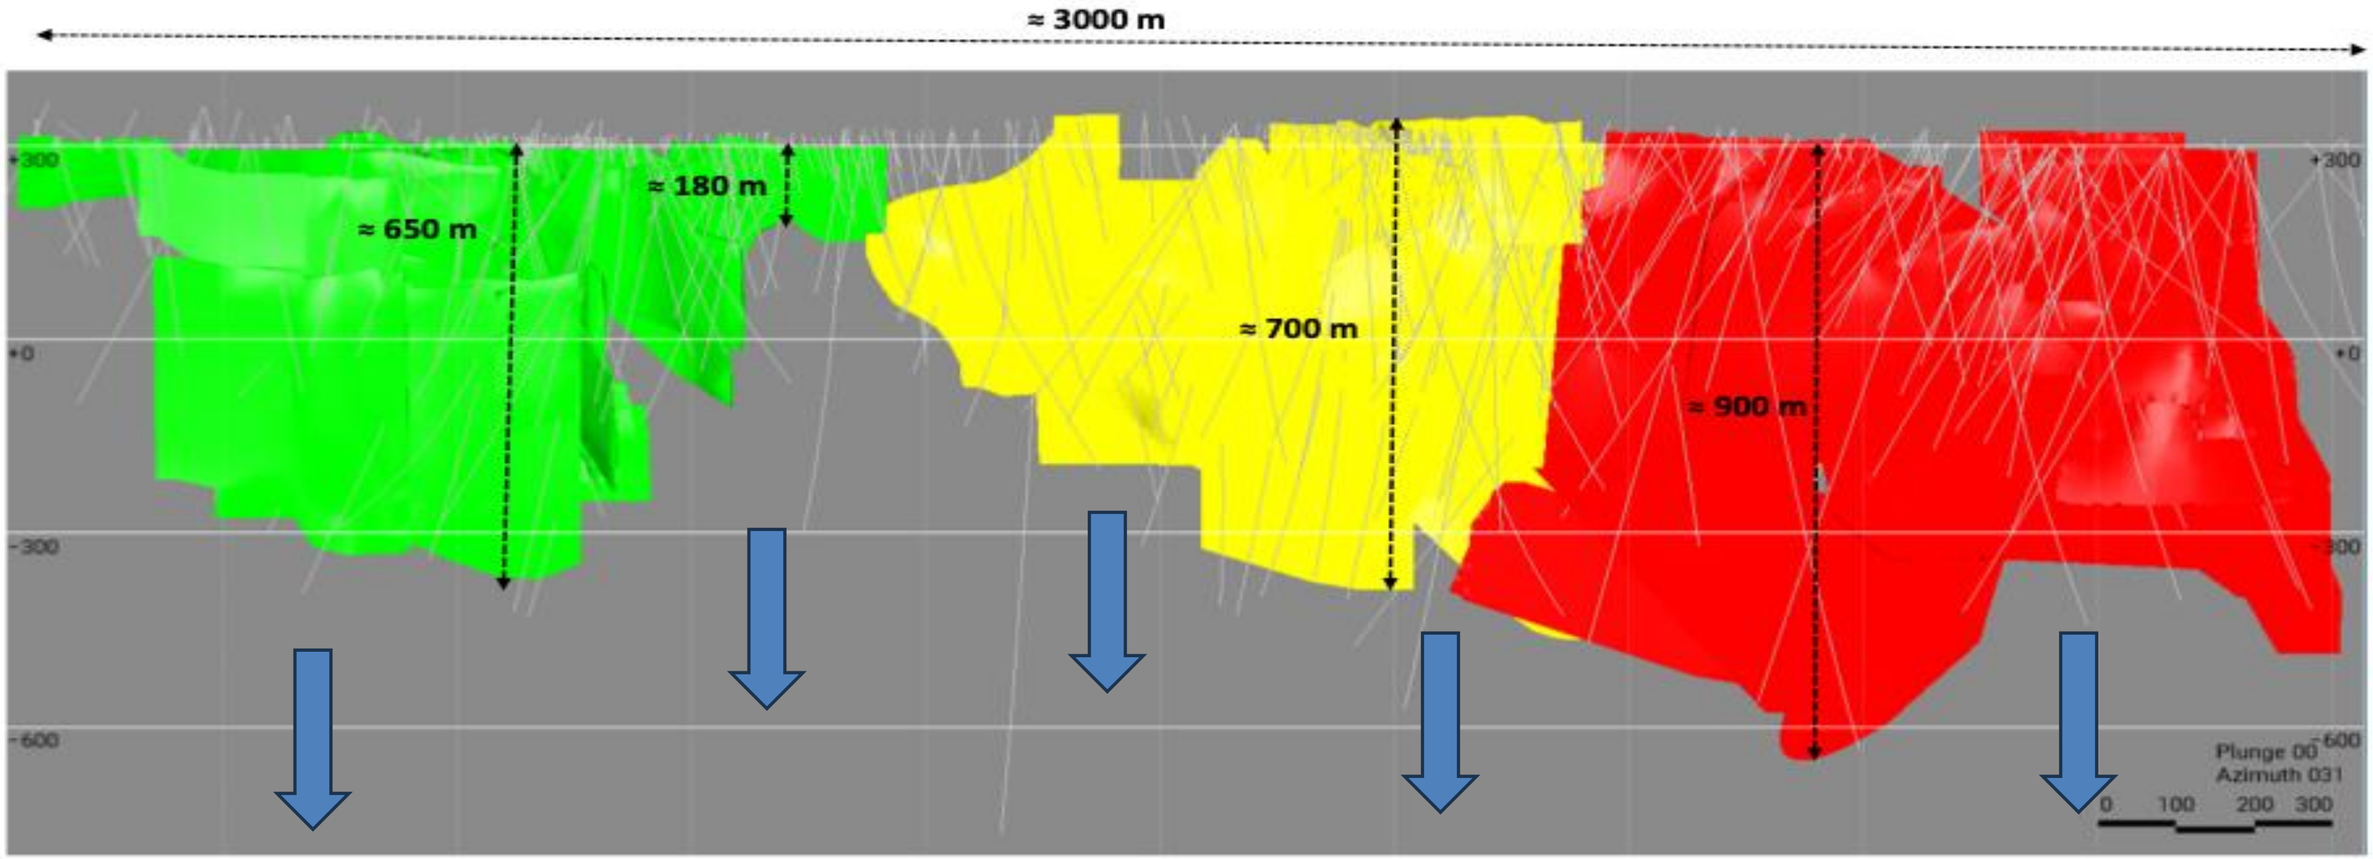


In shorts

1. The lengths of the lodes along the NW-SE strike is ca. **3000m**
2. Widths of the lodes envelop ranges from ca. **120-540m**
3. Vertical length ranges from **180-900m**
4. Widths of the individual lodes ranges from **4-160m**

Barsele Orebody

Vertical lengths CAS lodes: ranges 180-900m

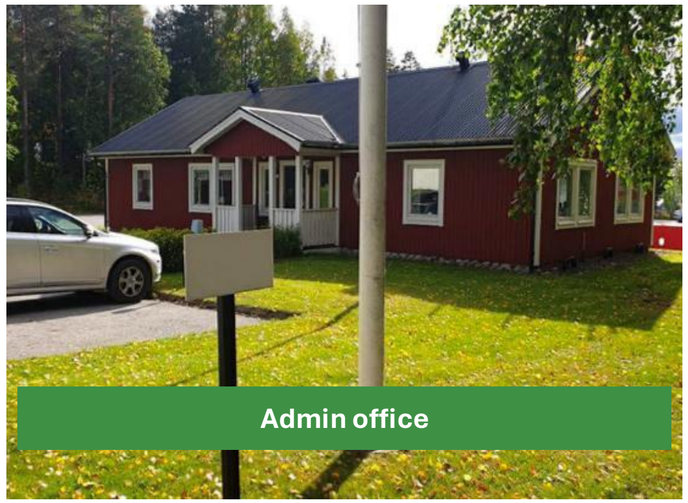


Project Assets and Facilities

Barsele storage facility and offices -5700m^2

Core storage facility - 4558m^2

Core logging facility



Admin office

XRF scanning facility

- Resource block model and exploration targets, metallurgical test work and site layout
- Geologists, technicians and support staff
- Apartments and vehicles
- Community goodwill
- Preferencing local businesses for supplies

Location, location, location...

Storuman

- 750km north of Stockholm
- Located at an intersection between two European highways and two railroads
- 6000 inhabitants
- 20km from Barsele project
- 3 airports within 1.5hrs

Power generation

- Hydro and wind at a significantly low cost of US2.6c /kWh
- 2 carbon neutral hydro plants within 8km either side of the Barsele project

ESG & Responsible Development

High Environmental Standards

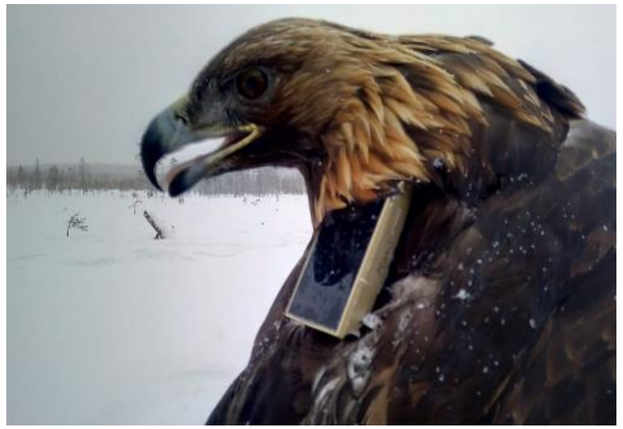
- Science-led environmental management
- Regulatory compliance & international best practices
- Continuous monitoring and risk mitigation

Strong Community Relationships

- Early and ongoing stakeholder engagement
- Respect for local communities and heritage
- Long-term partnership approach

Extensive Baseline Studies

- Regular Water Quality Measurements
- Birds & other Species
- Environment & Habitat Types
- Plants & Vegetation
- Aquatic Ecology
- Geochemistry
- Archaeology & Cultural Heritage
- Waterflow & Hydrology



Comprehensive baseline work completed to support responsible project development

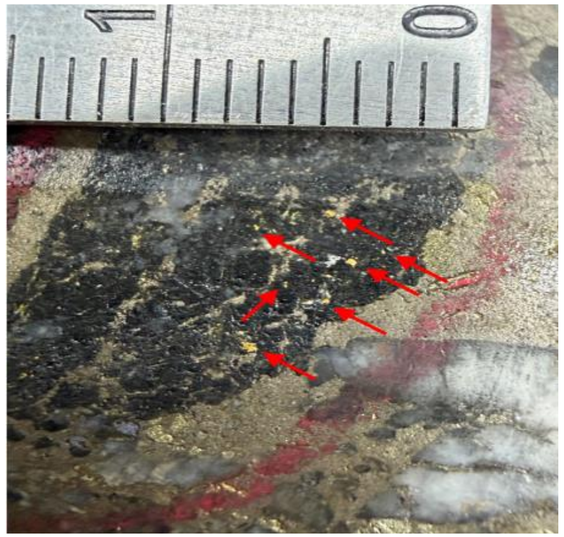
Rajapalot, Finland

Key metrics

- 100% owned gold-cobalt project in Northern Finland
- Shear zone-hosted orogenic gold system with cobalt credits
- Excellent infrastructure, including power and road access
- More than 120,000 metres of drilling done to date
- Mineralisation remains open at depth across the project

Current Inferred Mineral Resources | Effective 26 August 2021

9.8 Mt	2.8 g/t	867 Koz	4,311 t
Tonnes	Gold Grade	Contained Gold	Contained Cobalt



PAL 0406 (Palokas) visible gold in core @ 111m downhole depth

Rajapalot, Finland | 2026 infill drilling

2026 program and next steps

- 45 new diamond holes for 10,385 m, plus extension of PAL0063
- 32 of 37 infill holes returned significant intercepts
- Results support the interpreted lodes at Raja, Palokas and South Palokas
- Updated Mineral Resource estimate expected early November 2026
- Updated PEA to follow

Standout 2026 intercepts

Zone: Raja
Hole: PAL0433

12.6 m @ 233.56 g/t Au
14.19 g/t Au at 50 g/t top cut
881 ppm Co | from 219.90 m

Zone: Palokas
Hole: PAL0406

17.35 @ 16.46 g/t Au
13.54 g/t Au at 50 g/t top cut
652 ppm Co | from 97.65m

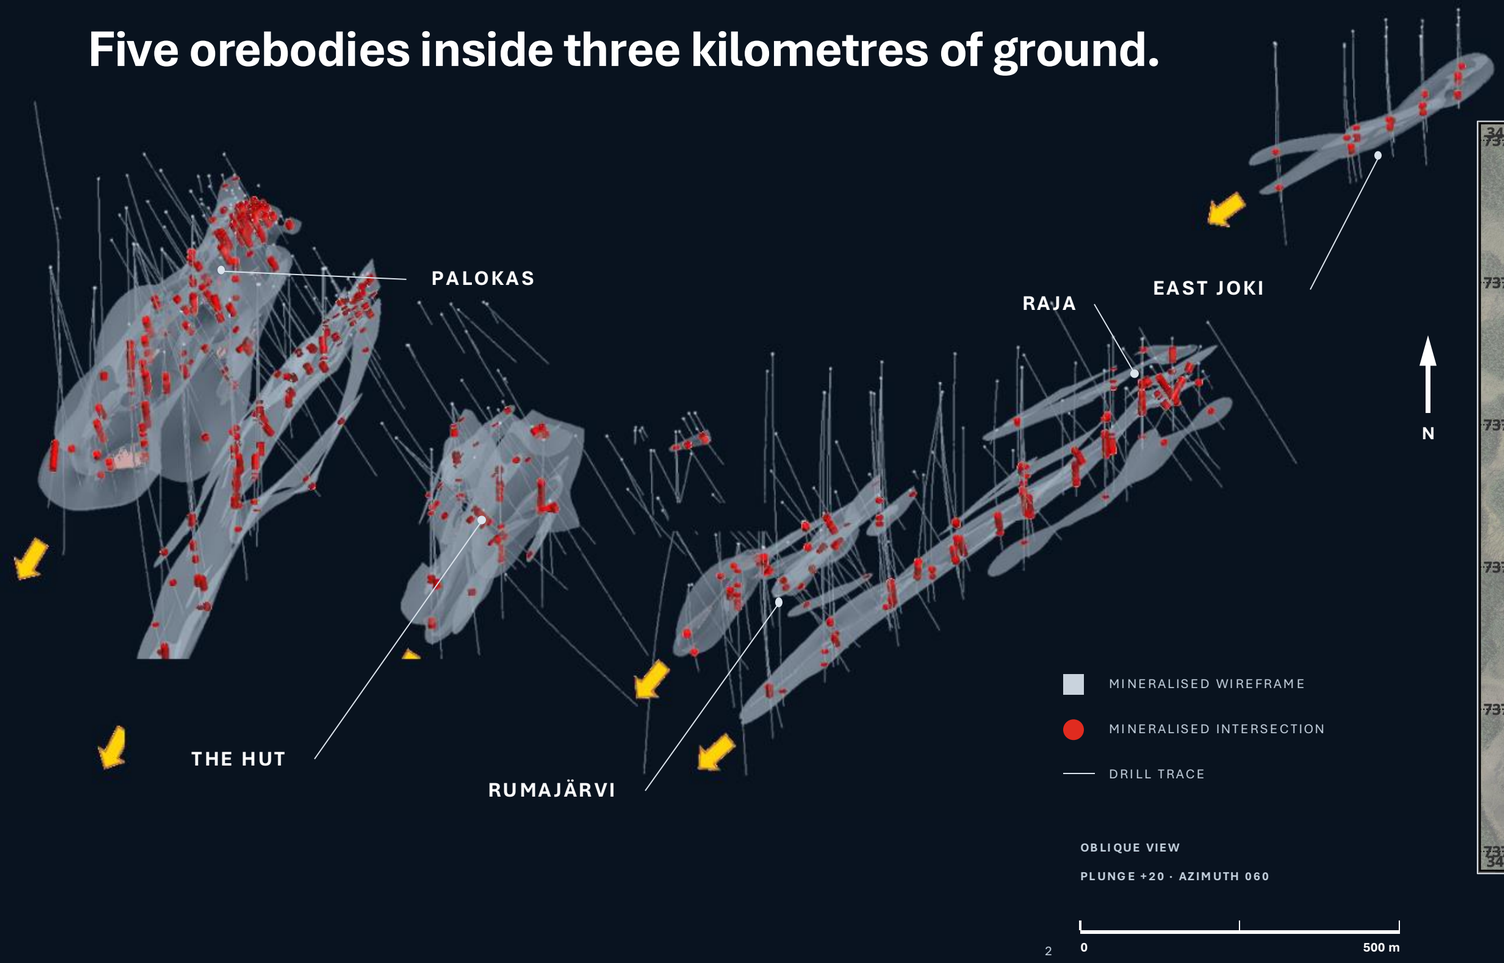
Cobalt as a Strategic Raw Material

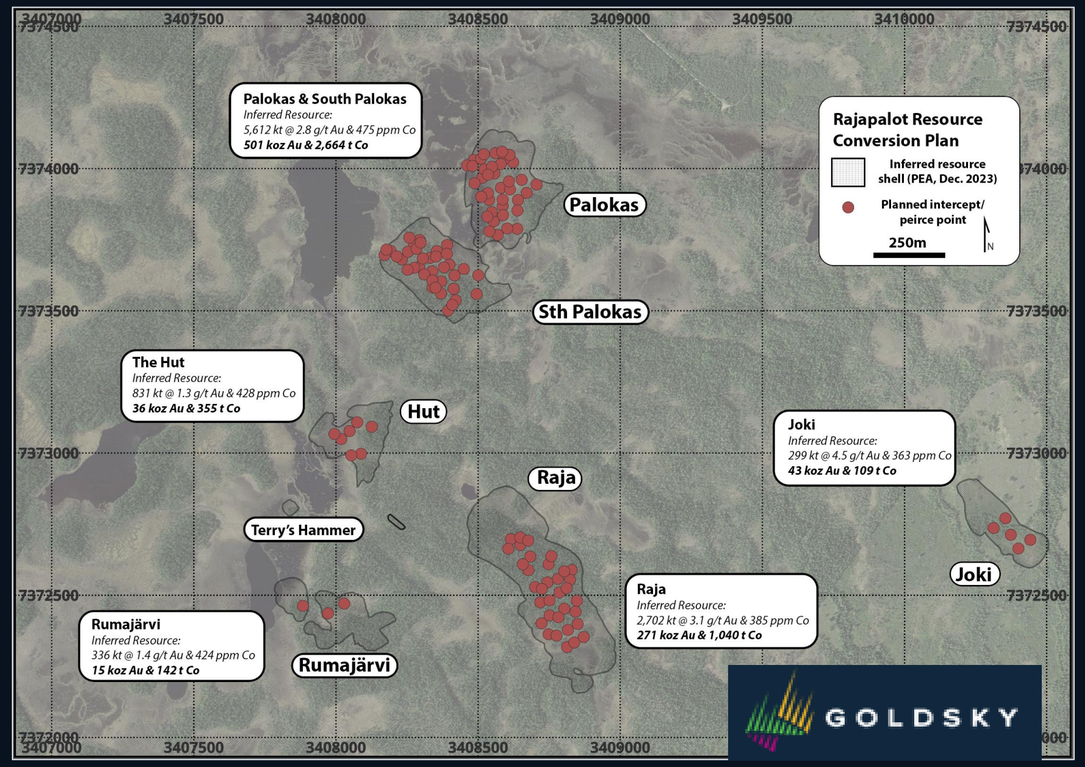
- The European Union (EU) have within the Critical Raw Materials Act regulated 16 raw materials as being strategic, meaning they are highly prioritized for extraction within the EU
- These raw materials are considered to be so fundamental, above all for electrification, as to be included in the strategic classification
- Projects that can make a meaningful contribution to the EU: s supply of strategic raw materials can apply for strategic status, which is designated by the EU Commission
- If a company and project obtain strategic status, the overall permitting process receives a time lock of 27 months

Rajapalot Orebody

THE FIVE REPORTED ZONES

Five orebodies inside three kilometres of ground.





Sweden & Finland: 2026-2027 work program – C$35million

Sweden | Barsele

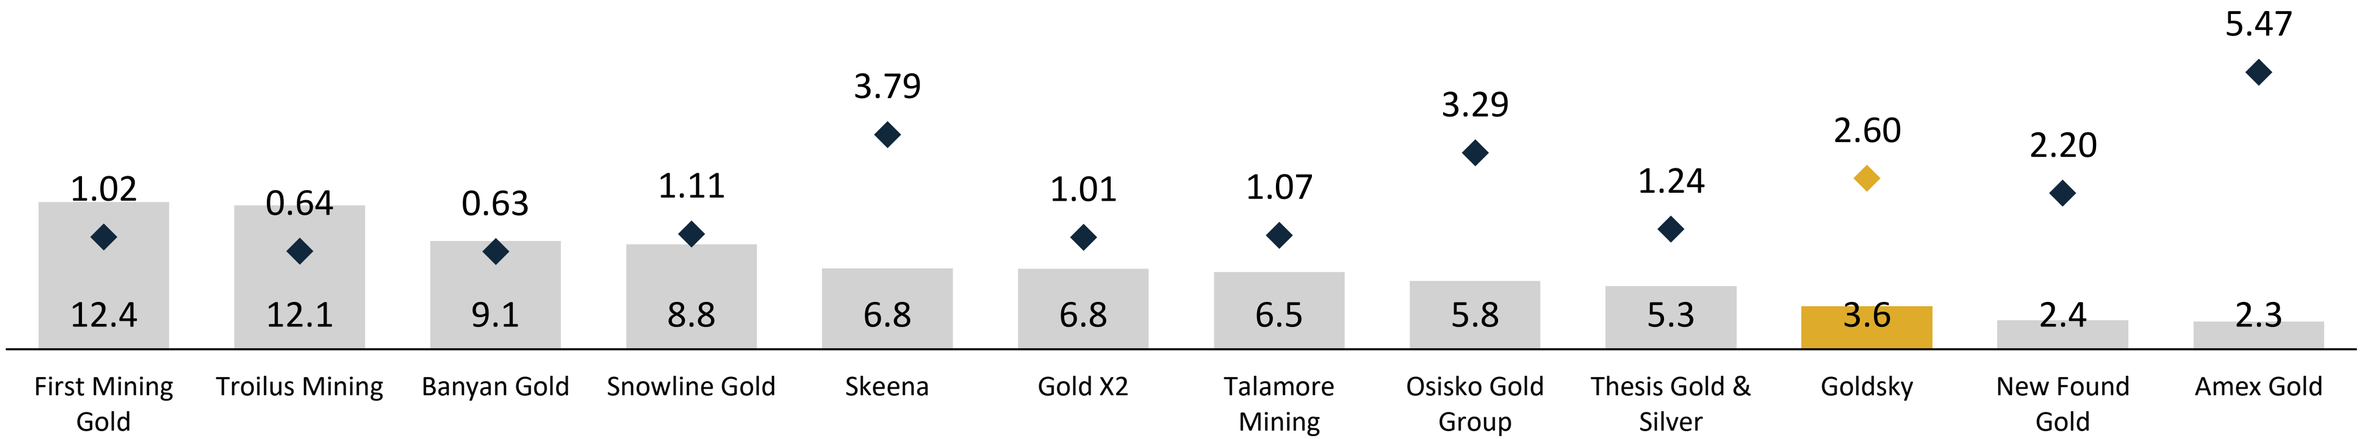
RESOURCES	Barsele Maiden Resource: **In November 2026**
PEA	PEA kick off to be completed by **Q2 2027, then PFS by year-end 2027**
DRILLING	Drilling Program **25,000 metres** from October to April 2027; **10,000 metres additional** exploration drilling

Finland | Rajapalot

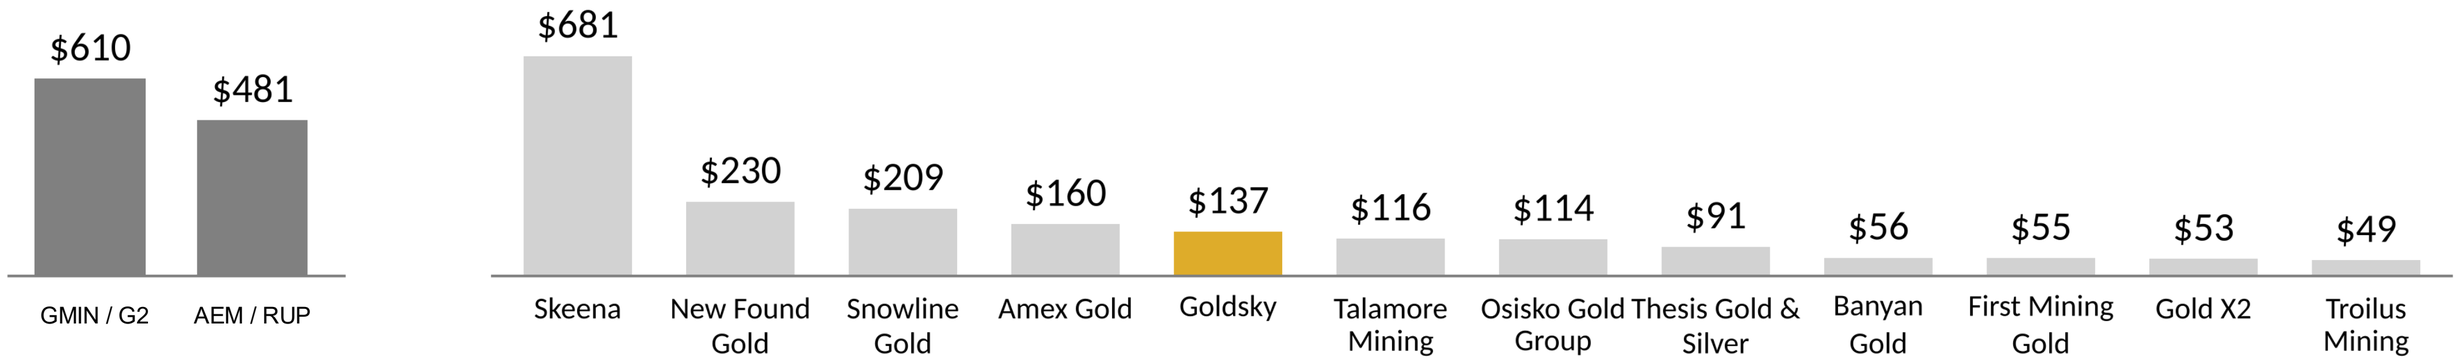
RESOURCES	Resource Update in **In November 2026**
PEA	**Q4 2026** new PEA for Rajapalot using a gold price of **USD$3,500**
DRILLING	Infill drilling program January-April 2027: **10,000 metres**

Select Gold Peer Benchmarking | Resource & Multiples

Total Attributable M&I+I Resource (Moz AuEq) & Grade (g/t AuEq)



EV / M&I+I Resource (US$oz AuEq)



1 Does not include contingent value rights
Source: Company filings and FactSet as of October 21, 2026
Note: Total attributable resources include all available NI 43-101 mineral resources across all assets
Note: Resource equivalent calculations made at long-term metal prices of US$4,300/oz Au, US$57.60/oz Ag, US$23.50/lb Co and US$5.30/lb Cu

Summary

- Experienced management team with proven track record
- Barsele and Rajapalot provide significant opportunity for continued gold ounce growth
- Fully funded with C$52m in treasury and supportive new investor base. Simplified ownership structure
- Tier-1 jurisdictions: Excellent infrastructure
- New analyst coverage initiated
- Goldsky added to the GDXJ

GOLDSKY
RESOURCES

Appendices

November 2026

Executive leadership team with Proven Operational Experience

Russell Bradford
CEO & Exec. Director

- +35 years of project management & operational experience
- MD at Aston Minerals, merged with Torque Metals
- Sr. VP at Galiano Gold
- GM at Mantra Resources (A$1B sale) & LionOre Mining ($7B sale)
- Based in the UK

Brent Doster
CFO

- +20 years of financial management and administration experience across the coal and gold sectors
- Senior finance roles in publicly listed mining and mining services companies operating in Africa and internationally
- Recently served as Group CFO of Goldplat plc

Noora Ahola
Exec. Director & MD, Nordics

- Forestry Engineer with a Masters Degree of Natural Resources and Landscape Management
- CEO of Mawson Finland prior to the transaction
- Expert in Nordic permitting and government project oversight with 25 years experience
- Based in Finland

Neil MacRae
SVP, Corporate Development

- Capital markets professional with 29 years' experience in IR, commodities trading and corporate development
- Previous IR roles with First Majestic Silver Corp, Sherwood Copper Corp (merged with Capstone in 2008), Farallon Mining Ltd. (sold to Nyrstar in 2011), NovaGold Resources Inc. and Santacruz Silver Mining Ltd

Gabriella Hammarskjöld
Environmental Manager

- + 24 years Swedish environmental & permitting experience
- Senior roles at Sweco, Nordkalk, Vattenfall, SKB, Sida & Naturvårdsverket
- Expertise in mining permitting, EIA, water protection & Natura 2000
- Led complex permitting, regulatory & stakeholder processes across Sweden

Carl Danielsson
Manager of Communications and Public Affairs

- Nearly 20 years' experience in Swedish public affairs and PR
- Former Partner at The Labyrinth Public Affairs, (metals & minerals lead)
- Background in consultancy, media relations and Swedish & European politics
- Expertise in mining policy and legislation, permitting and stakeholder engagement
- Two years' experience working on the Barsele project

Strong board with Mine development capability

Peter Breese

Non-Exec Chairman

- +35 years executive & operations experience
- CEO of Galiano Gold, overseeing build of Asanko Gold Mine
- CEO of Mantra Resources, acquired by ARMZ for A$1B in 2011
- CEO of Norilsk Nickel
- COO of LionOre Mining, acquired by Norilsk for C$7B

Marc Legault

Non-Exec. Director

- +40 year of experience in gold and base metals industry
- Geologist and was also a P.Eng
- 34 years working with Agnico Eagle Mines on various exploration, operations, and management positions

Jeff Couch

Non-Exec. Director

- London-based capital markets executive with deep experience in natural resources and emerging markets
- CEO of Lydian Mining and Alufer Mining
- Former Head of Investment Banking at BMO Capital Markets (Europe), with senior roles at Credit Suisse and Citigroup

Darren Morcombe

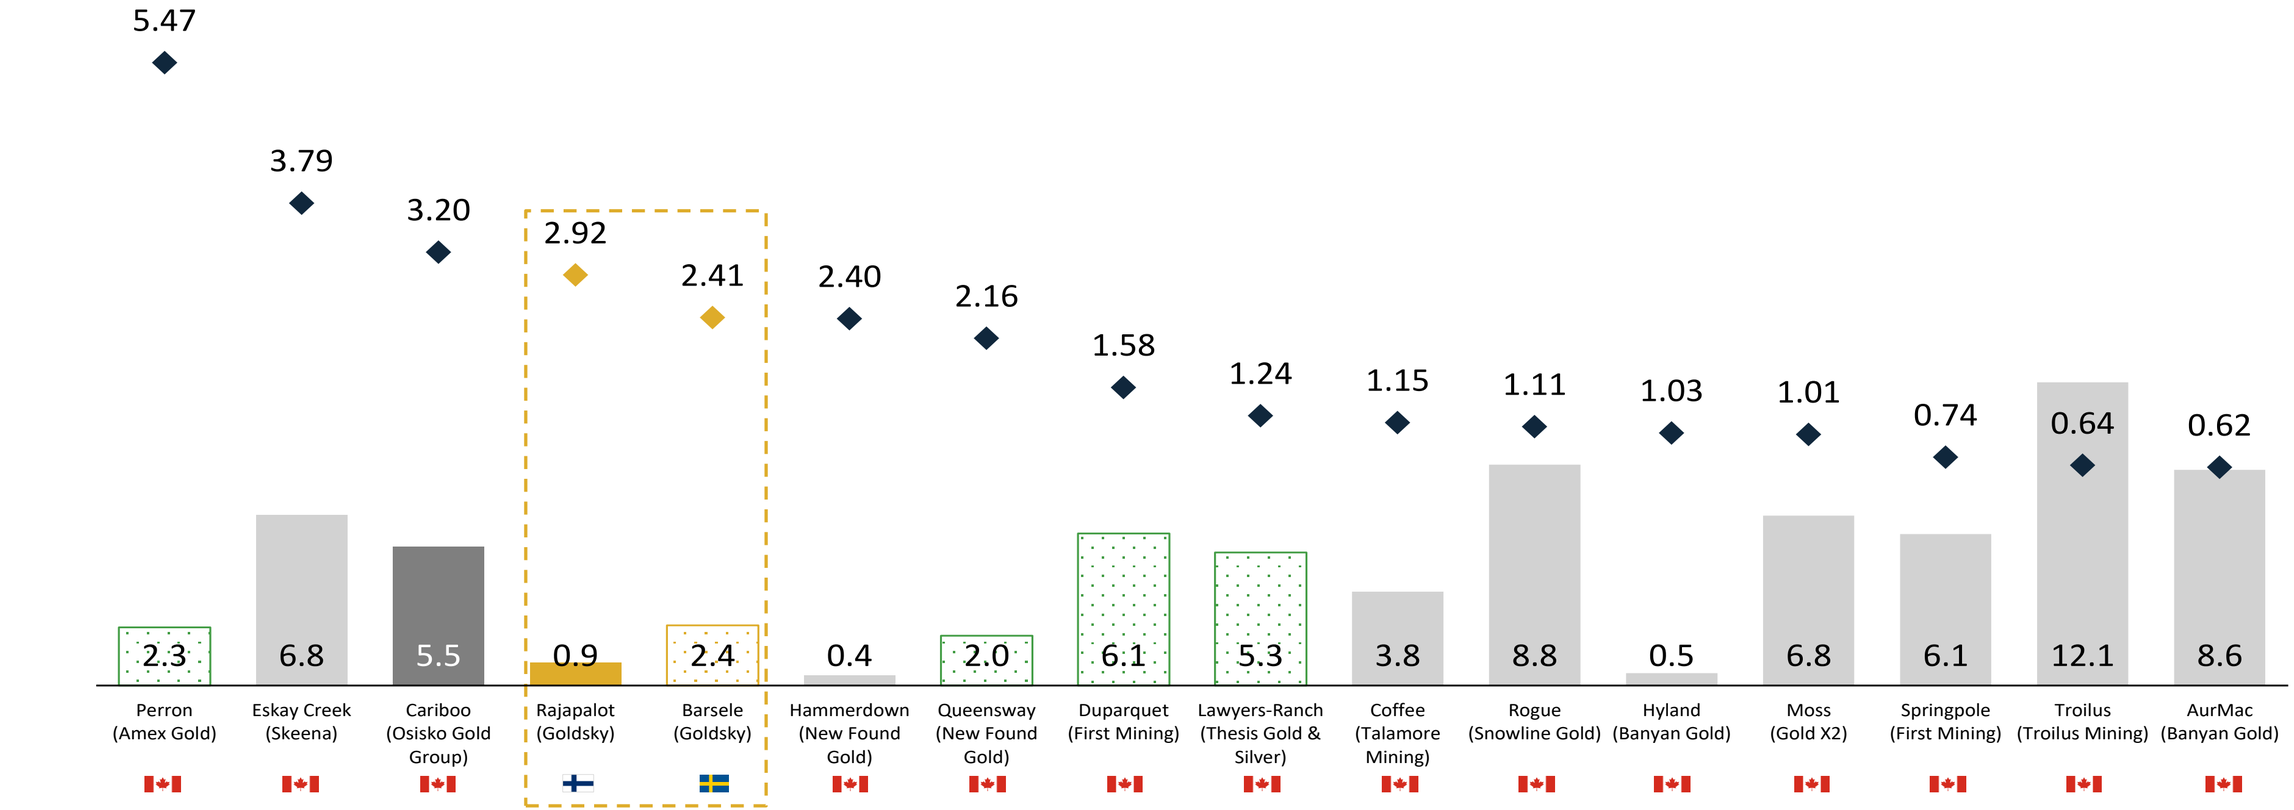
Special Advisor

- +30 years of international experience in a variety of roles in the natural resource sector
- Track record of success, deep involvement in Southern Cross Gold, & as advisor to Foran Mining (formerly CEO / Exec Chairman), while acting as Chairman & Founder of Springtide Capital

Select Gold Peer Benchmarking | Flagship Resource

Consolidated ownership of Barsele allows Goldsky to enter new phase of disciplined project advancement building on a multi-million-ounce gold resource base in a Tier 1 jurisdiction with attractive grade profile

Flagship Project Attributable M&I+I Resource (Moz AuEq) & Grade (g/t AuEq)



Source: Company filings and FactSet as of October 21, 2026
Note: Resource equivalent calculations made at long-term metal prices of US$4,300/oz Au, US$57.60/oz Ag, US$23.50/lb Co and US$5.30/lb Cu
